

Solar Array Farm Generates Clean Energy for Las Vegas Properties

MGM RESORTS

MGM Resorts reduced the Scope 2 emissions of its Las Vegas properties by 41% and supplied 40% of electricity needs for 65 million square feet by developing a 640 acre, 323,000 panel solar array farm.

- ▶ Reduced Scope 2 emissions by over 40% at Las Vegas properties between 2019 and 2022
- ▶ Developed the capacity to produce up to 90% of the daytime energy needs for MGM Resorts' Las Vegas properties excluding The Cosmopolitan of Las Vegas
- ▶ Generated 40% of total energy use for MGM Resorts' Las Vegas properties
