

## Renovated Net Zero Energy School Uses 67% Less Energy than Conventional Buildings

**River Trails**  
SCHOOL DISTRICT 26

Prairie Trails School uses up to 67% less energy (compared to baseline) than conventional buildings after the renovation of a 1960's-era facility with energy-efficient features, components and materials.

- ▶ Renovated former daycare facility that uses no fossil fuels
- ▶ First net-zero energy school renovation in the nation to meet 2018 PHIUS+ Source Zero requirements
- ▶ Provides a model project that has been toured by hundreds of architects, engineers, administrators and policymakers
