

## Energy Treasure Hunt 2.0 Results in Energy Savings

Stellantis saved more than 2.8 million kWh from 28 measures in two months after implementing a new phase of Energy Treasure Hunts (ETH). With a more focused approach at the system level, ETH 2.0 surveys are completed more quickly and at a higher rate.

- ▶ Improved ETH deployment by 75-90%, and reduced execution time down to half-a-day per site
- ▶ Accelerated the start of implementing opportunities from 1 month to 1 week
- ▶ Aligned effort by seasonality to better align the impact of equipment and operations with the greatest need
