

State-of-the-Art Water Savings Project at Eau Claire, Wisconsin Factory

Nestlé Health Science's Eau Claire, Wisconsin factory saves over 26 million gallons of water annually after implementing a state-of-the-art reverse osmosis system. The factory manufactures nutritional drink products.

- ▶ Saves over 26 million gallons of water annually
- ▶ Reverse osmosis design has been replicated at the Nestlé USA plant in Anderson, IN, and is planned for future sites
- ▶ Factory reduced carbon footprint by 37 MTCO₂e per year through the water project
