

# LOS ANGELES UNIFIED SCHOOL DISTRICT (LAUSD): Achieving 100% Clean Renewable Energy by 2040

LAUSD designed a pathway to achieve 100% clean, renewable energy in its electricity sector by 2030, and in all energy sectors by 2040, by launching a task force of internal and external stakeholders, increasing its clean electricity from 19MW to 345MW, and more.

Expects \$20 million annual cost savings from displaced fossil fuels, and more than 400 thousand metric tons of CO<sub>2</sub> annually

More than 25 school sites currently undergoing technical evaluation review for solar PV installation

On path to meeting LAUSD's 2030 and 2040 goals

Improved health benefits for LAUSD students, 80% of which come from disadvantaged communities
