OHIO DEPARTMENT OF REHABILITATION AND CORRECTION: Ohio Reformatory for Women RTU Project

The Ohio Department of Rehabilitation and Correction completed a three-year facility project to install state-of-the-art HVAC technology, energy efficiency metering, waste reduction measures, and water use reduction measures.

GHG emissions via natural gas consumption expected to be reduced by more than 45%

Energy efficiency expected to improve by almost 25%

Planned composting and recycling measures to achieve 90% waste diversion by 2030

Designed to accept a future PV system that will power over 50% of electrical utility requirements
