**BETTER  
PROJECT**

## **TOWN OF SOUTHAMPTON, NY: Southampton Town Hall Sustainability Improvements**

**The Town of Southampton, NY reduced greenhouse gas emissions by more than 210 metric tons of CO<sub>2</sub>e per year at its 100+ year old town hall building after completing a multi-year project to retrofit the steam heating, lighting, and water systems.**

-  **Replaced steam infrastructure with 14 variable refrigerant flow heat pump units and eliminated 100% of the fossil fuel burning systems for steam heat**
-  **Installed automatic sensor faucets to decrease water usage by more than 90%**
-  **Installed all LED fixtures and reduced electricity usage by more than 16,000 kWh per month**
-  **Maintained occupancy during renovations and trained town staff in equipment installation and building systems management**
