**311** Name: **Tustumena Lake** Cause: **Undetermined**

CES reported an outside fire near Tustamena Lake area. Forestry engines and helicopter crew were toned out and arrived on scene to find a large column of smoke coming from the south side of the lake. Noticing that accessibility was difficult for ground crews, the helicopter hooked up their bucket and started getting water on the fire. The incident commander quickly ordered tactical resources. An Aerial Supervision Module from Fairbanks, and an Airtanker from Palmer were sent to assist. After observing the fire's behavior, 2 Scoopers and a load of smokejumpers were ordered to the fire. Due to higher priority fires, the Airtanker was diverted to another incident, but the Scooper remained on scene and with Tustamena Lake so close were able to drop a large amount of water on the fire.

Fire behavior moderated today due to higher RH values and lower temperatures. However, the fire is still burning actively through grasses and stringers of black spruce. A group of firefighters tested current structure protection at the Clear Creek Assault Strip and Salmon Loaf cabin. This group also evaluated structure protection needs for other military assets in preparation for the northward advance of the fire. On the south side of the fire, crews continue to secure the fire edge to reduce the threat to structures. There is a significant amount of downfall and the fire is burning deep into the duff layer, so this work is tedious. A module and engines patrolled the Richardson Highway and adjacent communities.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
