

Government of India  
Ministry of Communications  
Department of Telecommunications  
New Delhi

**21<sup>st</sup> September 2022**

**Inviting comments on the draft Indian Telecommunication Bill, 2022**

Ministry of Communications had initiated a public consultative process to develop a modern and future-ready legal framework in telecommunication.

In July 2022, a Consultation Paper on '*Need for a new legal framework governing Telecommunication in India*' was published and comments were invited. Comments have been received from various stakeholders and industry associations.

Based on the consultations and deliberations, the Ministry has now prepared the draft Indian Telecommunication Bill, 2022.

To facilitate further consultations, an Explanatory note to provide a brief overview of the Bill has also been prepared.

Comments may be sent on the email ID : **naveen.kumar71@gov.in**

Last date of sending the comments will be **20<sup>th</sup> October 2022**.

---

## Explanatory note to the draft Indian Telecommunication Bill, 2022

## **Explanatory note to the Indian Telecommunication Bill, 2022**

### **A. Introduction:**

With 117 crore subscribers, India is the world's second largest telecommunication ecosystem. The telecommunication sector employs more than 4 million people and contributes about 8% of the country's GDP.

The existing regulatory framework for the telecommunication sector is based on the Indian Telegraph Act, 1885. The nature of telecommunication, its usage and technologies have undergone a massive change since the era of "telegraph". The world stopped using "telegraph" in 2013.

We now live in the era of new technologies such as 4G and 5G, Internet of Things, Industry 4.0, M2M Communications, Mobile Edge Computing, etc. These technologies are creating newer opportunities for India's socio-economic growth. Therefore, India needs a legal framework attuned to the realities of the 21<sup>st</sup> century.

In the past eight years, the Government has taken several initiatives for the growth of the telecommunication sector. These measures include rationalising the definition of AGR, rationalising bank guarantees and interest rates, allowing for 100% FDI under the automatic route, delicensing of frequency bands, streamlining process of SACFA clearances for mobile towers, etc.

The Government has also committed huge amounts for digital inclusion. Providing high quality connectivity in unconnected areas, revival of BSNL, taking optical fiber to all gram panchayats, developing India's own telecom technology stack, and developing telecom manufacturing ecosystem, demonstrate the government's commitment to digital inclusion.

It is in this context that we have taken up the initiative to restructure the legal and regulatory framework for the telecommunications sector.

### **B. Consultations:**

The Ministry of Communications initiated a public consultative process to develop a modern and future-ready legal framework. In July 2022, a Consultation Paper on

*'Need for a new legal framework governing Telecommunication in India'* was published and comments were invited.

The Consultation Paper explained the existing legal framework and issues associated with it. The Consultation Paper highlighted the evolution of telecommunication regulation in other countries.

Comments have been received from various stakeholders and industry associations. The Ministry has examined the comments carefully and the following key themes have emerged:

- Recognition and acknowledgement of the need for a new legal framework that is future-ready;
- The need for updating the nomenclature and definitions of relevant terms in the telecommunication legal framework;
- The role that a strong legal framework can play in ensuring steady rollout of new telecommunication technologies;
- Need for legal certainty regarding spectrum management including issues relating to the use, allocation, and assignment, based on the underlying principle that spectrum is a natural resource that needs to be assigned in a manner that best subserves the common good;
- Alignment of telecommunication standards with international standards and best practices;
- Importance of cybersecurity, national security and public safety concerns, while ensuring constitutional and procedural safeguards;
- Need for a distinctive insolvency framework that allows continuity of provision of telecommunication services, so long as the licensee pays all dues; and
- Need for rationalization of penalty framework, providing for specific penalties that are clearly linked with the nature of breach and gravity of the offence.

Many suggestions around procedures, licensing reforms, frequency assignment have come in. These suggestions have been noted for inclusion in future reforms.

Based on the consultations and deliberations, the Ministry of Communications has now prepared a draft Indian Telecommunication Bill, 2022.

While preparing the draft, relevant legislations in Australia, the European Union, United Kingdom, Singapore, Japan and the United States of America have also been examined in detail.

The Bill will replace the existing legal framework governing telecommunication in India, comprising of the Indian Telegraph Act, 1885, the Wireless Telegraphy Act, 1933 and the Telegraph Wires (Unlawful Possession) Act, 1950.

### **C. Drafting practices:**

The Bill has been drafted in a plain and simple language so that any citizen is able to understand its provisions. It uses illustrations and contextual definitions where necessary to further clarify the intent of a section. There are no provisos used. Instead, any special situations or exceptions are addressed in separate clauses.

This explanatory note provides a brief overview of the Bill to facilitate further consultations.

### **D. Disclaimer:**

This explanatory note is for informative purpose only. It is not a part of the Bill. The explanatory note shall not be considered for legal interpretation of the provisions of the Bill.

### **E. Chapter-wise Summary of Bill**

#### **Preamble**

1. The preamble of the Bill recognises that telecommunication is a key driver of socio-economic development. It specifies that telecommunication infrastructure and telecommunication network are important parts of public infrastructure. It emphasizes the need to ensure availability of affordable, reliable, secure and universal telecommunication services.
2. It further recognises that spectrum is a valuable and inexhaustible natural resource, which has an element of public good. Therefore, it is vital to ensure efficient use and management of spectrum.

3. In a way, spectrum is similar to *atma*, which is *ajar*, *amar* as described in Shrimad Bhagwad Gita. Like *atma*, spectrum too does not have any physical form, yet it is omnipresent.
4. The Bill aims to consolidate and amend the existing laws governing provision, development, expansion and operation of telecommunication services, telecommunication networks and telecommunication infrastructure and assignment of spectrum.

### **Chapter 1: Short title, extent and commencement**

5. This chapter introduces the title of the Bill as the “Indian Telecommunication Bill, 2022” and provides that the law will extend to the whole of India.

### **Chapter 2: Definitions**

6. The Bill replaces the outdated concepts under the existing framework such as “telegraph”, “telegraph officer”. The new definitions are comprehensive and relevant to present day realities.
7. The term “**telecommunication**” has been defined to mean transmission, emission, or reception of any messages, whether by wire, radio, optical or other electro-magnetic systems.

The term “**telecommunication services**” has been defined to include broadcasting services, electronic mail, voice mail, voice, video and data communication services, audiotex services, videotex services, fixed and mobile services, internet and broadband services, satellite based communication services, internet based communication services, in-flight and maritime connectivity services, interpersonal communications services, machine to machine communication services, over-the-top (OTT) communication services which is made available to users by telecommunication.

The term “**telecommunication network**” means a system or series of systems of telecommunication equipment, or telecommunication infrastructure, or both, including terrestrial or satellite networks or submarine networks, or a combination

of such networks, used or intended to be used for providing telecommunication services, but shall not include customer equipment.

### **Chapter 3: Licensing, Registration, Authorization and Assignment**

8. The Bill recognizes the globally established principle of exclusive privilege of the Central Government in relation to telecommunication services, telecommunication network, telecommunication infrastructure and spectrum.
9. The Bill further provides the structure for the Government to exercise this privilege through the grant of:
  - (a) licenses for telecommunication services or telecommunication networks;
  - (b) registrations for establishing telecommunication infrastructure;
  - (c) authorization for the possession of wireless equipment; and
  - (d) assignment of spectrum.
10. **License:** For provision of Telecommunication Services and Telecommunication Networks, an entity shall have to obtain a license.

To ensure that there is no disruption in the sector, an entity providing telecommunication services or telecommunication network under current law shall be entitled to continue to operate under its existing terms and conditions till it migrates to a set of new terms and conditions.

11. **Registration:** For providing telecommunication infrastructure, an entity shall have to obtain only a registration, not a license. This will simplify the setting up of infrastructure.

Telecommunication infrastructure includes telecommunication lines, posts, telecommunication towers, ducts, conduits, cable corridors, or any civil, electrical, or mechanical infrastructure used or capable for use for telecommunication as notified by the Central Government. A list of such telecommunication infrastructure is provided in Schedule 5.

An entity providing telecommunication infrastructure under existing laws shall be entitled to continue to operate under existing terms and conditions for five years or optimally migrate to a set of new terms and conditions.

12. **Authorization:** For possession of wireless equipment, an entity shall have to obtain an authorization.

Wireless equipment refers to any telecommunication equipment used or capable of use in wireless communication, including any wireless transmitter that is capable of use for broadcasting or emission of wireless communication.

13. The possession and use of any equipment (such as jammers) that blocks telecommunication or is likely to disrupt law and order, shall be prohibited unless its use is authorized by the Central Government.
14. The Bill provides that the Central Government may prescribe rules for the grant of license, registration, authorization or assignment, their terms and conditions and payments. It has been ensured that subordinate legislation is within the limits set by main legislation.
15. The Bill also provides that the terms and conditions of a license, registration, authorisation, or assignment, as the case may be, will not be modified with retrospective effect to the detriment of the relevant entity. This will remove any uncertainty in the minds of existing stakeholders.
16. As brought out above, the Bill provides adequate provisions to ensure regulatory certainty. It provides for continuity of licenses and authorizations under the old regime. To avoid any possible disruption, the Bill provides that rules, guidelines and administrative orders issued under the existing laws will continue until they are superseded by rules under the new law.
17. The Bill provides that any entity that has been granted license under this Act shall identify the persons to whom it provides the services through a verifiable mode of identification. The Bill also provides that the identity of the person sending a message shall be available to a user. This provision is important to prevent cyber frauds.

## Spectrum Management

18. Spectrum is a scarce natural resource. It is not merely an economic good but also a public good and its efficient use is in public interest. At present, spectrum assignment in India is done through a combination of government policies and judicial decisions.
19. The Bill lays down explicit statutory framework and regulatory clarity for the Central Government to undertake spectrum assignment. The underlying philosophy of the Bill is that spectrum assignment should serve the common good and ensure widespread access to telecommunication services.
20. The Bill provides for assignment of spectrum primarily through auction. For certain specified functions relating to government and public interest like defence, transportation, research, etc. the Bill provides an enabling framework for assignment of spectrum through administrative process.
21. The Bill provides for an enabling framework for optimal utilization of spectrum. These include the following provisions:
  - (a) **Technology agnostic use:** To enable the utilization of the spectrum in a liberalized and technologically neutral manner, a spectrum assignee may deploy new technologies within its spectrum.
  - (b) **Re-farming and re-purposing:** To enable repurposing of any frequency range for a different use, re-arrangement of the frequency range is often required. Therefore, the Bill provides for re-farming and harmonization of frequency range.
  - (c) **Sharing, trading, leasing, and surrender:** To enable effective utilization of spectrum, the bill enables sharing, trading, leasing and surrender of spectrum assigned, subject to prescribed terms and conditions.
  - (d) **Returning unused spectrum:** To ensure efficient utilization of spectrum, the Bill provide a process of return of unutilized spectrum.

22. The Bill provides policy continuity through the following provisions:
- (a) Existing spectrum assigned through auction will continue till the duration of such assignment.
  - (b) Existing spectrum assigned through the administrative process shall continue to be valid on the terms and conditions on which it had been assigned, for a period of five years from the day the Bill comes into force, or the date of expiry of such assignment, whichever is earlier.
  - (c) Exemptions relating to spectrum usages at the date of enactment of the new law would also continue. The Bill provides flexibility for any exemptions that the Central Government may grant on spectrum usage, in the public interest.

For example, with effect from 28.01.2005, the Central Government has done away with the requirement of a license for use of low power wireless equipment in the frequency band 2400 MHz to 2483.5 MHz. This and other existing exemptions, will continue unless otherwise notified.

#### Breach of Terms and Conditions of License, Registration, Authorization or Assignment

23. In case of the breach of terms and conditions of a license, registration, authorization or assignment granted, Central Government should be able to impose penalties.
24. The Bill provides the punitive actions that Central Government can take in case of breach of terms and conditions. Such actions include suspension, revocation, curtailment of the duration of the license, imposition of financial penalties, giving directions to the entity, etc.

The penalties shall be commensurate with the severity of the breach of terms and conditions.

25. For judicious use of the powers, the Bill provides that the punitive action shall be taken after considering all the relevant factors, such as nature and gravity of the

breach, its repetitive nature, the revenue loss caused, as well as any other mitigating or aggravating factors.

26. The Bill recognizes that there is no one-size-fits-all approach, and the intent and willingness of the licensee, assignee or registered entity to remedy any breach, should be adequately considered before taking punitive actions.

#### Voluntary undertaking

27. The Bill lays down a framework for “voluntary undertakings”. It is a mechanism through which a licensee, registered entity, or assignee may submit an undertaking to address any breach of terms and conditions.

This innovative approach towards remedying breaches will bring in significant relief for the entire telecom ecosystem.

28. Such an undertaking may include an undertaking to take specified remedial actions or refrain from taking some actions in a timebound manner.
29. If such a voluntary undertaking is accepted by the Central Government, then no proceedings shall be taken against the licensee, registered entity or assignee for such breach. However, any failure to comply with any such voluntary undertaking accepted by the Central Government, will result in penalties as specified.

#### Dispute resolution

30. The Bill provides for the right of appeal before the appellate authority. It also creates an enabling provision for the Central Government to set up an alternate dispute resolution mechanism such as arbitration, mediation or other process of dispute resolution.

### **Chapter 4: Right of Way for Telecommunication Infrastructure**

31. Right of Way is a pre-requisite for establishing telecommunication networks and improvement of telecommunication services. The existing regulatory framework, based on Right of Way Rules, 2016, has had a limited impact in addressing bottlenecks in rapid expansion of telecommunication infrastructure.

32. Effective mechanism for obtaining RoW will be essential for rapid roll-out of newer technologies such as 5G. The Bill provides for a robust regulatory framework within the federal structure, to obtain RoW in a uniform, non-discriminatory manner, for establishment of telecommunication infrastructure.
33. The Bill seeks to remove the limitations by providing an enabling framework that facilitates RoW for laying or building telecommunication infrastructure by any facility provider.

The term “facility provider” includes any licensee or registered entity, including any contractor or sub-contractor or agent working for the Central Government or licensee or a registered entity.

34. The Bill provides for a uniform and non-discriminatory regulatory framework governing:
  - (a) establishment of telecommunication infrastructure on public property; and
  - (b) enabling provisions in respect of private property.
35. Any public entity that receives an application from a facility provider is required to grant permission in an expeditious manner. Rejection of an application can only be for limited substantive grounds.

This provision also applies to any public property vested for infrastructure projects (example: infrastructure developed in PPP mode) where applications for RoW are made to the public entity granting the concession or contract for such projects.

36. With regard to RoW over private property, the Bill recognizes the importance of negotiation and mutual agreement. Any facility provider may submit an application seeking RoW, to a person under whose ownership, control, or management a private property is vested.

Rules in this regard may be expected to provide the overarching framework such as the procedure for making such application and timelines, framework

governing objections by owner or occupier of the property, and the manner in which objections will be resolved.

37. Only in exceptional circumstances, where the owner or occupier does not provide the RoW requested, the Central Government may step in to acquire the RoW in public interest.
38. Any grant of RoW, whether on public property and private property, is also required to be on a non-discriminatory and non-exclusive basis. This is with a view to ensuring a level-playing field to service providers, choice to consumers, and improved quality of telecommunication service.
39. In line with the vision of PM Gati Shakti initiative, the Bill provides for establishing common ducts and cable corridors in infrastructure projects to ensure integrated development of infrastructure.
40. The Bill also contains an enabling provision to create a specific dispute resolution framework relating to Right of Way.

## **Chapter 5: Restructuring, Defaults in Payment and Insolvency**

### Mergers, Demergers, Acquisitions

41. The Bill seeks to simplify the framework for mergers, demergers and acquisitions, or other forms of restructuring, by only requiring intimation to the licensing authority.
42. In other words, any licensee or registered entity will simply be required to comply with the scheme for restructuring as provided under the Companies Act, 2013, and inform the Department of Telecommunications, as required.
43. The entity that emerges pursuant to such restructuring, would need to comply with the terms and conditions, including fees and charges, applicable to the licensee or registered entity.

## Insolvency

44. Unlike many other natural resources, spectrum is completely reusable. It has no physical form. It remains in existence whether it is used or not. Other natural resources like minerals and oil get consumed when used. Buildings get deteriorated when in use. Machines need maintenance when in use. Unlike all such asset classes, spectrum neither gets permanently consumed, nor does it require maintenance when used.

In view of this uniqueness of spectrum, the Bill addresses situations where spectrum is not being put to use due to insolvency.

45. The proposed provision on insolvency aims to ensure continuity of telecommunication services. This provision builds upon the existing framework under the IBC 2016. It seeks to balance due utilization of spectrum and realization of the value of the spectrum for the larger public good.
46. The Bill provides that a licensee or assignee undergoing insolvency proceedings can continue to operate if:
- (a) it continues to provide the telecommunication service,
  - (b) does not default on the payment of any dues under the license or assignment, and
  - (c) complies with any additional or modified terms and conditions of license.

If such licensee or assignee is unable to comply with these requirements, then the assigned spectrum will revert to the control of the Central Government.

47. This section also seeks to create disincentive for acquiring spectrum at a value lower than auction-determined price. In that sense, this provision aims to retain the value of the public good in the hands of the government.

## Special framework to address defaults in payment by licensee, registered entity, or assignee

48. The Bill provides an enabling framework for the Central Government to address defaults in payment by a licensee, registered entity, or assignee. If the Central

Government determines that there exist extraordinary circumstances, it may take the following measures:

- (a) Deferral of the payment of such amounts or a part thereof;
- (b) Conversion of a part or all of the amounts into shares in the licensee, registered entity or assignee;
- (c) Write-off of such amounts or a part; or
- (d) Relief from payment of such amounts or a part.

## **Chapter 6: Standards, Public Safety and National Security**

### Standards

- 49. The Bill empowers the Central Government to prescribe standards in order to ensure quality and reliability of telecommunication. Such standards may apply to telecommunication services, or to telecommunication equipment, telecommunication network and telecommunication infrastructure.
- 50. The aim is to ensure public safety. This is all the more crucial given the widespread use of telecommunications, whether for education, or entertainment, or tele-medicine, or facilitating e-mandis.

### Public Emergency, Public Safety, National Security

- 51. The Bill provides an enabling framework for the Central Government to address any situations of public emergency, public safety, or national security concerns. These provisions provide for time-bound limited suspension of transmission of messages, or of provision of telecommunication networks or services, while ensuring the rights of the citizens of India.
- 52. The Central Government has also been empowered to direct any licensee to transmit in its telecommunication services or telecommunication network, specific announcements.

## **Chapter 7: Telecommunications Development Fund**

- 53. The Universal Service Obligation Fund (“**USOF**”) was established under the Telegraph Act, to meet the “universal service obligation” which was to provide

telegraph access to people in rural and remote areas at affordable and reasonable prices.

54. Under the Bill, the USOF is sought to be expanded into the “Telecommunication Development Fund” (“**TDF**”), by adding further objectives of underserved urban areas, R&D, skill development, etc.
55. The payments made, if any, for the grant of a license, registration or assignment shall include a sum attributable to the TDF, as determined by the Central Government.

All amounts payable towards the USOF under licenses granted prior to the date of the new Bill, shall be deemed to mean amounts payable towards the TDF. The sums shall be first credited to the Consolidated Fund of India, which shall then be utilised by the Central Government for the purposes of the TDF.

56. This can address the larger public purpose of ensuring delivery of universal telecommunication service to underserved rural and urban areas, research and development of new technologies, and promote employment and training activities.
57. This provision will enable India to emerge as a leader in telecom technology. It will enable development of telecom technologies and generate new employment.

## **Chapter 8: Innovation and Technology Development**

58. Chapter 8 provides for an enabling framework for a “Regulatory Sandbox” to facilitate innovation and technological development in telecommunication. It will enable any person to conduct tests and collect evidence relating to new telecommunication innovations under a suitably flexible framework.
59. Such framework will provide for monitoring provisions, special terms and conditions, and exemptions from terms and conditions of any license, assignment, registration or authorization.

## **Chapter 9: Protection of Users**

60. Today telecom service is the entry point of digital world. Increasingly, digital services are accessed through telecom services. Therefore, user protection has emerged as an important policy objective for the government.
61. Chapter 9 provides an enabling framework for the Central Government to prescribe measures to ensure protection of telecommunication users.
62. Every telecom user wishes to know who is calling. This will help in preventing cyber-frauds done using telecom services. Therefore, provisions related to identity have been included in the Bill at relevant places.
63. Users also need protection from calls that they want to avoid. The Bill enables a legal framework for preventing harassment of users from unsolicited calls and messages.

### Duty of users:

64. Rights and duties go hand in hand. If duties are done, then rights get automatically implemented. Our Constitution also recognizes both rights and duties.
65. In today's world, telecommunication offers possibilities that were unknown to mankind. From connecting families to creating newer economic opportunities, the potential is limitless. Therefore, it is a civic duty of every individual to use telecommunication responsibly.
66. Therefore, in the interest of the sovereignty, integrity or security of India, friendly relations with foreign states, public order, or preventing incitement to an offence it shall be a duty of every citizen not to furnish any false particulars, suppress any material information or impersonate another person while establishing identity for availing telecommunication services.

## **Chapter 10: Miscellaneous**

Chapter 10 provides for miscellaneous provisions that addresses various aspects.

67. The Bill provides an enabling framework for creating the security interest that a licensee or a registered entity can provide lenders financing such entities to provide regulatory certainty to lenders. This will facilitate greater capital flows in the telecommunication sector.
68. It deals with the power of the Central Government to certify persons for operation of wireless equipment on a shipping vessel or aircraft.
69. It provides a framework governing certification of persons seeking to engage in amateur services. "Amateur services" is defined as radiocommunication services for the purpose of self-training, intercommunication and technical investigations carried out by amateurs, i.e., by duly authorized persons interested in radio technique solely with a personal aim and without any pecuniary interest.
70. The Bill also provides for an enabling framework to notify relevant rules. It is envisaged that a comprehensive and consolidated set of rules will be notified in this regard.

## **Chapter 11: Offences**

71. The Bill consolidates and updates the various provisions on penalties and offences under the existing law. Taking into consideration the developments in criminology and penal jurisprudence, the Bill has kept the penalty of imprisonment or heavy fines only for a small set of critical offences.
72. Gradation of certain penalties has been introduced for violation of the provisions of the law. The penalties under the Bill focus on compliance to the provisions of the law, rather than on imprisonment and punishment.
73. For most of the offences, the Bill specifies fines, and also provides for compounding the same. The decriminalization of certain offences by removing imprisonment, and levying only fines, as well as compounding of multiple offences, will help in development of telecom ecosystem.
74. The Bill also seeks to eliminate the obsolete and redundant penalties for many offences under existing laws. Examples are: penalty for opposing establishment

of telegraphs on railway land; intrusion into signal-room; trespass in telegraph office or obstruction; telegraph officer fraudulently sending messages without payment; etc.

75. Schedule 3 provides a tabulation of penalties for violation of specific provisions of the Bill. Offences for which imprisonment and fine are prescribed include:

- (a) providing telecommunication service or establishing networks, without a license;
- (b) gaining unlawful access to telecommunication network, or unlawfully intercepting any message;
- (c) contravention detrimental to national security;
- (d) possessing equipment that blocks telecommunication;
- (e) wilful tampering, removing or damaging telecommunication infrastructure or telecommunication network;
- (f) use unauthorised telecommunication service, network or infrastructure, knowingly;
- (g) impersonating authorized personnel of licensee, registered entity or assignee to perpetuate fraud; and
- (h) misrepresentation of identity required for availing telecommunication services.

76. All other offences, such as causing damage through negligence to telecommunication infrastructure or networks, possessing wireless equipment without license, contravention of provisions relating to protection of users, such as violation of Do Not Disturb, or not taking prior consent of telecommunication users before sending specified messages etc. have only prescribed fine and not imprisonment.

These offences are non-cognizable, i.e. an offence in which a police officer has no authority to arrest without warrant.

77. All offences under the Bill are bailable. Furthermore, compounding (i.e., settlement in lieu of criminal proceedings), is allowed in respect of most offences, except the ones such as providing telecommunication services without valid license, unlawful interception, etc.

## **Chapter 12: Repeal and Savings**

78. The Bill seeks to replace three laws: the Indian Telegraph Act, 1885, the Indian Wireless Telegraphy Act, 1933 and the Telegraph Wires (Unlawful Possession) Act, 1950.
79. However, with a view to ensuring smooth transition to the new framework, and avoid any possible disruption, it provides for continuity of actions taken under the repealed laws. It also provides that rules under the repealed laws would continue, till such time that new rules are formulated.

\*\*\*

<b>Draft</b>		
<b>Indian Telecommunication Bill, 2022</b>		
Section No	Title	Page
<b>Chapter 1: Short Title, Extent and Commencement</b>		
1	Short title, extent and commencement	4
<b>Chapter 2: Definitions</b>		
2	Definitions	4
<b>Chapter 3: Licensing, Registration, Authorization and Assignment</b>		
3	Exclusive Privilege	7
4	Licensing, Registration, Authorization and Assignment	8
5	Spectrum Management	9
6	Sharing, Trading, Leasing and Surrender of Spectrum	10
7	Breach of Terms and Conditions	11
8	Voluntary Undertaking	11
9	No refund of Fees	12
10	Appeal	12
11	Alternate Dispute Resolution	12
<b>Chapter 4: Right of Way for Telecommunication Infrastructure</b>		
12	Definition of terms used in this Chapter	13
13	Right of way for telecommunication infrastructure in public property	13
14	Right of way for telecommunication infrastructure on property not covered under Section 13	15
15	Non-discriminatory and non-exclusive grant of right of way	16
16	Telecommunication infrastructure distinct from property on which it is installed	16
17	Power of Central Government to establish common ducts and cable corridors	17
18	Dispute resolution relating to this chapter	18

<b>Chapter 5: Restructuring, Defaults in Payment and Insolvency</b>		
19	Mergers, demergers and acquisitions	18
20	Specific conditions in event of insolvency and bankruptcy of licensees, registered entities or assignees	18
21	Special framework governing defaults in payment by licensees, registered entities or assignees	20
22	Power to waive fee, interest, additional charges, penalty or grant exceptions	20
<b>Chapter 6: Standards, Public Safety and National Security</b>		
23	Power to prescribe standards	21
24	Provisions for Public Emergency or Public Safety	21
25	National Security, External Relations or War	22
26	Power to give directions in public interest	22
<b>Chapter 7: Telecommunication Development Fund</b>		
27	Establishment of Telecommunication Development Fund	23
28	Payment of contribution by licensee, registered entity or assignee	23
29	Crediting of sum to Consolidated Fund of India	23
30	Grants and loans by the Central Government	24
31	Administration of Fund	24
<b>Chapter 8: Innovation and Technology Development</b>		
32	Regulatory Sandbox	24
<b>Chapter 9: Protection of users</b>		
33	Measures for protection of users from specified messages	24
34	Duty of users	25
<b>Chapter 10: Miscellaneous</b>		
35	Creation of security interest	25
36	Certification of persons for operation of wireless equipment on a vessel or aircraft	25
37	Certification for amateur station operator	26

38	Civil liability	26
39	Protection of action taken in good faith	26
40	Act to have overriding effect	26
41	Power to make rules	27
42	Power of Central Government to amend Schedules	27
43	Power to remove difficulties	28
44	Rights in the Continental Shelf and Exclusive Economic Zone	28
45	Validation of certain acts and indemnity	28
46	Amendment to Act 24 of 1997	28
<b>Chapter 11: Offences</b>		
47	General provisions related to offences	30
48	Offences by companies	30
49	Compounding of offences	31
50	Power of search	31
51	Supply of information to authorized officers	32
<b>Chapter 12: Repeal and Savings</b>		
52	Repeal of certain Acts, saving of licenses, registrations or assignments and dissolution of certain authorities	32
53	Existing rules to continue	32
<b>Schedule – 1:</b> Spectrum assignment for Governmental functions, or purposes in view of public interest or necessity		33
<b>Schedule – 2:</b> Broadcasting services requiring License as of the Appointed Date		34
<b>Schedule – 3:</b> Offences and Penalties		35
<b>Schedule – 4:</b> Penalties for breach of terms and conditions		39
<b>Schedule – 5:</b> Telecommunication Infrastructure		40

## **Indian Telecommunication Bill, 2022**

Considering telecommunication is a key driver of economic and social development, and telecommunication infrastructure and telecommunication network are important parts of public infrastructure, and it is necessary to ensure availability of affordable, reliable, secure and universal telecommunication services; and

Considering spectrum is a valuable and inexhaustible natural resource, has an element of public good, and it is vital to ensure efficient management and use of the spectrum;

This Act consolidates and amends the laws governing provision, development, expansion and operation of telecommunication services, telecommunication networks and telecommunication infrastructure and assignment of spectrum and for matters connected or incidental thereto;

Be it enacted as follows:

### **Chapter 1: Short Title, Extent and Commencement**

#### **1. Short title, extent and commencement**

- (1) This Act may be called the Indian Telecommunication Act, 2022.
- (2) It extends to the whole of India.
- (3) It shall come into force on such date as the Central Government may, by notification, appoint and different dates may be appointed for different provisions of this Act and any reference in any such provision of this Act to the commencement of this Act shall be construed as a reference to the commencement of that provision.

### **Chapter 2: Definitions**

#### **2. Definitions**

In this Act, unless there is something repugnant in the subject or context:

- (1) “**allocation**” (of a frequency band) means an entry in the Frequency Allocation Table of a given frequency band for the purpose of its use by one or more terrestrial or space radiocommunication services or the radio astronomy service

under specified conditions, and “Frequency Allocation Table” means the table of frequency allocations under the NFAP;

- (2) “**appointed date**” means such date as the Central Government may, by notification appoint under sub-section (3) of Section 1;
- (3) “**assignment**” of a radio frequency or radio frequency channel means the authorization for a radio station to use a radio frequency or radio frequency channel under specified conditions, and the term “assignee” means any entity granted such authorization under sub-section (2) of Section 5;
- (4) “**broadcasting services**” means a telecommunication service intended to be received by the general public either directly or indirectly;
- (5) “**customer equipment**” means equipment deployed on the premises of a person, other than the equipment of the licensee or registered entity, to originate, route or terminate telecommunication, or equipment used by such person for accessing telecommunication services;
- (6) “**entity**” means a person, association of persons, firm, company or cooperative society, by whatsoever name called or referred to and engaged or intending to be engaged in providing telecommunication services, telecommunication network or telecommunication infrastructure, or using the spectrum or operating an earth station;
- (7) “**license**” means a license, approval, authorization, permission by whatever name called, granted under this Act for providing:
  - (a) telecommunication services (including only such broadcasting services as specified under sub-clause (c) below);
  - (b) telecommunication network; and
  - (c) broadcasting services in Schedule 2 and any other broadcasting services as may be notified by the Central Government as requiring a license;
- (8) “**licensee**” means the holder of the license and shall include any successors or assignees;
- (9) “**message**” means any sign, signal, writing, image, sound, video, data stream or intelligence or information intended for telecommunication;

- (10) “**NFAP**” shall mean National Frequency Allocation Plan issued from time to time, by the Central Government to provide guidance for the use of the spectrum;
- (11) “**notification**” means a notification published in the Official Gazette;
- (12) “**prescribed**” means prescribed by rules made under this Act;
- (13) “**registered entity**” means an entity registered under the provisions of this Act for providing telecommunication infrastructure;
- (14) “**Schedule**” means a schedule under this Act;
- (15) “**spectrum**” means the range of frequencies of radio waves;
- (16) “**station**” means one or more transmitters or receivers or a combination of transmitters and receivers, including the accessory equipment, necessary for carrying on radiocommunication services or radio astronomy services;
- (17) “**telecommunication**” means a transmission, emission or reception of any messages, by wire, radio, optical or other electro-magnetic systems, whether or not such messages have been subjected to rearrangement, computation or other processes by any means in the course of their transmission, emission or reception;
- (18) “**telecommunication equipment**” means any equipment, appliance, instrument, device, material or apparatus, including customer equipment, that can be or is being used for telecommunication, and includes software integral to such telecommunication equipment;
- (19) “**telecommunication infrastructure**” means the infrastructure used or capable of being used for the purpose of telecommunication, as listed in Schedule 5;
- (20) “**telecommunication network**” means a system or series of systems of telecommunication equipment, or telecommunication infrastructure, or both, including terrestrial or satellite networks or submarine networks, or a combination of such networks, used or intended to be used for providing telecommunication services, but shall not include customer equipment;
- (21) “**telecommunication services**” means service of any description (including broadcasting services, electronic mail, voice mail, voice, video and data

communication services, audiotex services, videotex services, fixed and mobile services, internet and broadband services, satellite based communication services, internet based communication services, in-flight and maritime connectivity services, interpersonal communications services, machine to machine communication services, over-the-top (OTT) communication services) which is made available to users by telecommunication, and includes any other service that the Central Government may notify to be telecommunication services;

- (22) “**user**” means any person using a telecommunication service;
- (23) “**wireless equipment**” means any telecommunication equipment used or capable of use in wireless communication, including any wireless transmitter that is capable of use for broadcasting or emission of wireless communication;
- (24) “**wireless communication**” means any telecommunication without the use of wires, including optical fibre, continuous electrical conductors, or similar modes, between the transmitting and the receiving apparatus.

### **Chapter 3: Licensing, Registration, Authorization and Assignment**

#### **3. Exclusive Privilege**

- (1) The Central Government shall have the exclusive privilege, within India, to:
- (a) provide telecommunication services;
  - (b) establish, operate, maintain and expand telecommunication network and telecommunication infrastructure; and
  - (c) use, allocate and assign spectrum.
- (2) The Central Government may exercise its privilege under sub-section (1) by granting to any entity, in the manner as may be prescribed:
- (a) license for providing telecommunication services or establishing, operating, maintaining and expanding telecommunication networks;
  - (b) registration for providing telecommunication infrastructure;
  - (c) authorization for the possession of wireless equipment; or
  - (d) assignment of spectrum.

- (3) The Central Government, if it determines that it is necessary in the public interest to do so, may exempt from the requirement of license, registration, authorization or assignment under sub-section (2), in the manner as may be prescribed.

#### **4. Licensing, Registration, Authorization and Assignment**

- (1) The grant of license, registration, authorization or assignment under sub-section (2) of Section 3, shall be subject to terms and conditions, including payment of entry fees, license fees, registration fees or any other fees or charges by whatever name called, as may be prescribed.
- (2) The terms and conditions referred in sub-section (1) shall not be modified with retrospective effect to the detriment of a licensee, registered entity or assignee except in exercise of powers under Sections 24 and 25 of this Act.
- (3) Any entity providing telecommunication services or telecommunication network, under a license granted prior to the appointed date, shall be entitled to continue to operate under the terms and conditions and for the duration as specified under such license or to migrate to the new set of terms and conditions, as may be prescribed.
- (4) Any entity providing telecommunication infrastructure under a registration granted prior to the appointed date, shall be entitled to continue to operate on the terms and conditions of such registration for a period of five years from the appointed date, or to migrate to the new set of terms and conditions, as may be prescribed.
- (5) The possession of wireless equipment shall require an authorization or any exemptions from such authorization, as may be prescribed.
- (6) The possession and use of any equipment that blocks telecommunication is prohibited, unless authorized by the Central Government for specific purposes.
- (7) Any entity which is granted a license under sub-clause (2) of Section 3, shall unequivocally identify the person to whom it provides services, through a verifiable mode of identification as may be prescribed.
- (8) The identity of a person sending a message using telecommunication services shall be available to the user receiving such message, in such form as may be prescribed, unless specified otherwise by the Central Government.

## 5. Spectrum Management

- (1) The Central Government shall assign the spectrum to best subserve the common good and ensure wide-spread access to telecommunication services, and may notify a National Frequency Allocation Plan (NFAP) for the use and allocation of spectrum.
- (2) The Central Government may assign spectrum for telecommunication through:
  - (a) auction;
  - (b) administrative process for governmental functions or purposes in view of public interest or necessity as provided in Schedule 1; or
  - (c) in any other manner as may be prescribed.

For the purposes of this Section:

“**auction**” means the competitive bid process for assignment of spectrum;

“**administrative process**” means assignment of spectrum without holding an auction.

- (3) The Central Government may prescribe such terms and conditions as may be applicable, for assignment of spectrum under sub-section (2), including the frequency range, methodology for pricing, price, fees and charges, payment mechanism, duration and procedure for the same.
- (4) Any spectrum assigned through the administrative process prior to the appointed date, shall continue to be valid on the terms and conditions on which it had been assigned, for a period of five years from the appointed date, or the date of expiry of such assignment, whichever is earlier.
- (5) The Central Government, if it determines that it is necessary in the public interest to do so, may by notification exempt specific usages within specified frequencies and parameters, from the requirements of sub-section (2). Any exemptions granted prior to the appointed date, shall continue under this Act, unless otherwise notified by the Central Government.

**Illustration:** *With effect from 28.01.2005, the Central Government has done away with the requirement of a license for use of low power wireless equipment in the frequency band 2400 MHz to 2483.5 MHz . Such exemption shall continue under this Act unless otherwise notified.*

- (6) The Central Government may, to enable more efficient use of spectrum, re-farm or harmonize any frequency range assigned under sub-section (2), subject to the terms and conditions, including payment of fees and charges, as may be prescribed.

For the purpose of this sub-section:

**“re-farming”** means repurposing of a frequency range for a different use, other than that for which it may currently be used by an existing assignee; and

**“harmonization”** means rearrangement of a frequency range.

- (7) The Central Government may, to enable the utilization of the spectrum in a liberalized and technologically neutral manner, notify that an assignee of a spectrum may deploy new technologies in such spectrum, subject to such terms and conditions, including applicable fees and charges, as may be prescribed.
- (8) The Central Government may, to promote optimal use of the available spectrum, assign a particular part of a spectrum that has already been assigned to an entity (“primary assignee”), to one or more additional entity/ entities (“secondary assignees”), where such secondary assignment does not cause harmful interference in the use of the relevant part of the spectrum by the primary assignee, subject to the terms and conditions as may be prescribed.
- (9) The Central Government, after providing a reasonable opportunity of being heard to the assignee concerned, if it determines that spectrum that has been assigned, has remained unutilized for insufficient reasons for a prescribed period, may terminate such assignment, or a part of such assignment, or prescribe further terms and conditions relating to spectrum utilization.
- (10) The Central Government may establish by notification, a monitoring and enforcement mechanism to ensure adherence to terms and conditions of spectrum usage and enable interference-free use of the assigned spectrum.

## **6. Sharing, Trading, Leasing and Surrender of Spectrum**

The Central Government may permit the sharing, trading, leasing and surrender of spectrum assigned under sub-section (2) of Section 5, subject to the terms and conditions, including applicable fees or charges, as may be prescribed.

## **7. Breach of Terms and Conditions**

- (1) In case of breach of any of the terms and conditions of license, registration, authorization or assignment granted under this Act, the Central Government may, after providing an opportunity of being heard to the party concerned, do any one or more of the following:
  - (a) direct such licensee, registered entity or assignee to do or abstain from doing any act or thing to prevent such breach or for such compliance;
  - (b) suspend such license, registration, authorization or assignment for a specified period;
  - (c) curtail the period of such license, registration, authorization or assignment;
  - (d) revoke such license, registration, authorization or assignment;
  - (e) vary such license, registration, authorization or assignment; or
  - (f) impose a penalty as specified in Schedule 4 after determining the category of severity of such breach.
  
- (2) In respect of any action to be taken pursuant to sub-section (1), the Central Government shall have due regard to the following factors, namely:
  - (a) nature, gravity and duration of breach taking into account the nature, scope and purpose of breach concerned;
  - (b) number of persons or entities affected, and the level of harm suffered by them;
  - (c) intentional or negligent character of the breach;
  - (d) repetitive nature of the breach;
  - (e) action taken by the licensee, registered entity or assignee to mitigate the breach;
  - (f) revenue loss caused to the Central Government; and
  - (g) any other aggravating or mitigating factors relevant to the circumstances of the case, such as, the amount of disproportionate gain or unfair advantage, wherever quantifiable, made as a result of the breach.
  
- (3) Any suspension, curtailment, revocation or variation under sub-section (1), may be reversed if the substantial violation is remedied to the satisfaction of the Central Government.

## **8. Voluntary Undertaking**

- (1) At any stage, a licensee, registered entity or assignee may give, and the Central Government may accept, in the manner as may be prescribed, a voluntary

undertaking in respect of any breach of terms and conditions of license, registration, authorization or assignment granted under this Act.

- (2) Such voluntary undertaking may include an undertaking to take specified action within a specified time; an undertaking to refrain from taking specified action; and an undertaking to publicise the voluntary undertaking.
- (3) The Central Government may accept such voluntary undertaking and with the agreement of the relevant licensee, registered entity or assignee, vary the terms included in such voluntary undertaking. Acceptance of voluntary undertaking by the Central Government shall constitute a bar on proceedings under this Chapter.
- (4) When a licensee, registered entity or assignee fails to comply with any terms of the voluntary undertaking, the Central Government may, after giving such person a reasonable opportunity of being heard, proceed with imposition of penalty under Section 7.

#### **9. No refund of fees**

- (1) An entity shall not be entitled to the refund of any such amounts paid in respect of or under a license, registration, authorization or assignment granted under this Act, if the same is suspended, curtailed, revoked or varied.
- (2) In the event an entity surrenders the license, registration, authorization or assignment granted under this Act, then any amounts paid in respect thereof, may be refunded subject to such deductions, as may be prescribed.

#### **10. Appeal**

Any person aggrieved by any action under this Chapter may prefer an appeal to the appellate authority as may be prescribed, within thirty days of the action and the appellate authority may pass such orders expeditiously as deemed fit under law.

#### **11. Alternate Dispute Resolution**

If the Central Government is of the opinion that any dispute, or class of disputes, under this Chapter may be resolved more appropriately by arbitration, mediation or other process of dispute resolution, then the Central Government may establish a suitable mechanism for resolution of such disputes.

## Chapter 4: Right of Way for Telecommunication Infrastructure

### 12. Definition of terms used in this Chapter

For the purpose of this Chapter:

- (1) “**facility provider**” means the Central Government or any licensee or registered entity, including any contractor or sub-contractor or agent working for the Central Government or licensee or a registered entity, and shall include any successors or assignees;
- (2) “**public entity**” means the Central Government, respective State Governments, local authority or such authority, body, company or institution incorporated or established by the Central Government or the State Government, or under any statute, in respect of property, under, over, along, across, in or upon which underground or over-ground or under-sea telecommunication infrastructure is to be established or maintained, vested in, or under, the control or management of such authority;
- (3) “**public property**” means any property, whether immovable or movable, including any machinery, which is owned by, or in the possession of, or under the control of any public entity.

### 13. Right of way for telecommunication infrastructure in public property

- (1) Any facility provider may submit an application to a public entity under whose ownership, control or management the public property is vested, to seek permissions for right of way for telecommunication infrastructure under, over, along, across, in or upon such public property. On receipt of an application from a facility provider, the public entity shall, subject to terms and conditions, grant permissions for all or any of the following acts, namely:
  - (a) survey such property for the purpose of assessing the feasibility for establishing telecommunication infrastructure; or
  - (b) enter the property from time to time to establish, operate, maintain, repair, replace, augment, remove or relocate any telecommunication infrastructure.

**Illustrations:**

- (a) *A Ministry of the Government of India owns certain land or is in possession of certain land, or has certain land under its control. This will be public property and the relevant Ministry a public entity.*
  - (b) *A road, lane, land, building, water pipeline or any other property owned by, or in the possession of, or under the control of a municipal authority is a public property and the municipal authority is a public entity.*
  - (c) *Any land, building or other property vested with a statutory authority is a public property, and the statutory authority is a public entity.*
  - (d) *Any land, building or other property owned by, or in the possession of, or under the control of a Government company is a public property, and the Government company is a public entity.*
  - (e) *Any land, building or other property owned by, or in the possession of, or under the control of a society or a research institute under the control of the Government is a public property, and such society or research institute is a public entity.*
- (2) The public entity shall grant permission under sub-section (1) in an expeditious manner, and within the timelines, as may be prescribed.
- (3) The public entity granting permission under sub-section (1), shall be entitled to collect fees for such right of way granted, which shall not exceed the amount, as may be prescribed.
- (4) Any rejection of an application under sub-section (1) shall be based only on substantive grounds.
- (5) The provisions of this Section shall also be applicable to any public property vested for infrastructure projects or class of infrastructure projects notified under Section 17, in respect of which, applications under sub-section (1) shall be made to the public entity granting the concession or contract for such projects.

**Illustrations:**

- (a) *National Highways Authority of India (NHAI) has granted a concession agreement to a non-government entity to build, operate and transfer a section of the national highway. The national highway is a class of infrastructure project notified under section 17 of this Act. NHAI is the relevant public entity for purposes of sub-section (1) of this Section.*

- (b) *Airport Authority of India (AAI) has granted a concession agreement to a non-government entity to build, operate and transfer an airport. The airport is a class of infrastructure project notified under section 17 of this Act. AAI is the relevant public entity for purposes of sub-section (1) of this Section.*
  - (c) *A department of a State Government has granted a concession agreement to a non-government entity to build, operate and transfer a sea-port. The sea-port is a class of infrastructure project notified under Section 17 of this Act. The relevant department of the state government which granted the concession agreement is the relevant public entity for the purposes of sub-section (1) of this Section.*
- (6) Any works on the property in which telecommunication infrastructure has been established, which necessitates the alteration, removal or relocation of the telecommunication infrastructure, shall be subject to prior notice to the appropriate authority and the relevant licensee or registered entity, terms and conditions, including the applicable fees and charges payable to the facility provider, as may be prescribed.

**14. Right of way for telecommunication infrastructure on property not covered under Section 13**

- (1) Any facility provider may submit an application to the person under whose ownership, control or management the property not covered under Section 13 is vested, to seek right of way for telecommunication infrastructure under, over, along, across, in or upon such property. On receipt of an application from a facility provider, such person may enter into an agreement, specifying such consideration as mutually agreed, for:
- (a) undertaking of surveys as may be required by the facility provider for the purpose of assessing the feasibility for establishing telecommunication infrastructure; or
  - (b) establishing, operating, maintaining, repairing, replacing, augmenting, removing or relocating any telecommunication infrastructure by the facility provider.
- (2) The Central Government may prescribe the procedure to be followed by a facility provider to enter, survey, establish, operate, maintain, repair, replace or relocate the telecommunication infrastructure, including the notice period, the manner of issuance of notice, the framework governing objections by owner or occupier of the property and the manner in which such objections would be resolved.

- (3) In the event the person under sub-section (1) does not provide the right of way requested, and the Central Government determines that it is necessary to do so in the public interest, it may, either by itself or through any other authority designated by the Central Government for this purpose, proceed to acquire the right of way for enabling the facility provider to establish, operate, maintain such telecommunication infrastructure, in the manner as may be prescribed.

#### **15. Non-discriminatory and non-exclusive grant of right of way**

Any person providing right of way under Section 13 or Section 14, shall ensure grant of right of way to the facility providers in a non-discriminatory manner and, as far as practicable, on a non-exclusive basis.

#### ***Illustrations:***

- (a) *A public entity has granted a facility provider “A” right of way on certain terms over the public property in its possession. If another facility provider “B” applies for right of way to the public entity in respect of the same property, such public entity will have to provide “B” right of way on the same terms, subject to availability of space to place the telecommunication infrastructure of “B” on such public property.*
- (b) *XYZ, a person under Section 14, has granted a facility provider “A” right of way on certain terms over the property in its possession. If another facility provider “B” applies for right of way to XYZ in respect of the same property, XYZ will have to provide “B” right of way on the same terms, subject to availability of space to place the telecommunication infrastructure of “B” on such property.*

#### **16. Telecommunication infrastructure distinct from property on which it is installed**

- (1) A facility provider shall not have any right, title or interest in the property on which telecommunication infrastructure is established, except the right to use the property as provided under Section 13 or Section 14.
- (2) The telecommunication infrastructure installed on any property, shall not be subject to any claims, encumbrances, liquidation or the like, relating to such property.
- (3) The telecommunication infrastructure installed on any property, shall not be considered as part of such property for the purposes of any transaction related

to that property, or any property tax, levy, cess, fees or duties as may be applicable on that property.

***Illustrations:***

- (a) *A tower is installed on land to enable hoisting and installation of telecommunication and wireless equipment used in telecommunication network. A diesel generator set and supporting operation equipment are installed on the land near the tower to support the working of the telecommunication equipment hoisted or installed on the tower. The tower, the telecommunication and wireless equipment, the diesel generator and supporting equipment are all telecommunication infrastructure and are not part of the land on which they are installed.*
- (b) *A tower is installed on the roof of a building to enable hoisting and installation of telecommunication and wireless equipment used in a telecommunication network. A diesel generator set and supporting equipment are installed on the roof to support the working of the telecommunication equipment. The tower, the telecommunication and wireless equipment, the diesel generator and supporting equipment are all telecommunication infrastructure and are not part of the building on whose roof they are installed. Such telecommunication equipment shall not be subject to claims, encumbrances, liquidation or the like that are applicable to such building.*
- (c) *A telecommunication equipment with supporting device to monitor its functioning and operations is installed on side of a wall of a building as part of a telecommunication network. The telecommunication equipment and supporting device are telecommunication equipment and are not part of the building on whose wall they are installed. Such telecommunication equipment shall not be subject to property tax levied on such building.*

**17. Power of Central Government to establish common ducts and cable corridors**

The Central Government may notify infrastructure projects or class of infrastructure projects, whether being developed by a public entity by itself, through a public private partnership or by any other person, that shall require establishment of common ducts or conduits or cable corridors, for installation of telecommunication infrastructure. Such telecommunication infrastructure shall be made available on open access basis to facility providers, subject to terms and conditions, including fees and charges, as may be prescribed.

**Illustrations:**

- (a) *Roads, bridges, highways, ports, airports, roads, inland waterways, canals, townships, Special Economic Zones, townships are a class of infrastructure projects.*
- (b) *A Ministry of the Government of India enters into a concession agreement with a non-government entity to build, operate, maintain an infrastructure facility for a period of time and then transfer the facility to a nominated authority or government agency at the end of the term of the concession agreement. This is an infrastructure project.*

**18. Dispute resolution relating to this chapter**

The Central Government may prescribe the procedure, the appropriate authority, the appellate authority, and terms and conditions, including time period for resolution of disputes, arising under the provisions of this chapter.

**Chapter 5: Restructuring, Defaults in Payment and Insolvency**

**19. Mergers, demergers and acquisitions**

- (1) Any licensee or registered entity may undertake any merger, demerger or acquisition, or other forms of restructuring, subject to provisions of applicable law, after providing notice to the Central Government of the same.
- (2) The entity that emerges pursuant to such merger, demerger or acquisition or other forms of restructuring shall comply with the terms and conditions, including fees and charges, applicable to the licensee or registered entity referred in sub-section (1), and such other terms and conditions, as may be prescribed.

**20. Specific conditions in event of insolvency and bankruptcy of licensees or assignees**

- (1) The provisions of this Section shall apply to the insolvency, bankruptcy and winding up of licensees or assignees, to achieve the larger public interest of enabling availability of telecommunications services in India or any part of India by ensuring efficient use of assigned spectrum.
- (2) A licensee, or assignee that becomes subject to any insolvency proceedings may continue to operate under the terms and conditions specified under such license

or assignment, if such licensee, or assignee meets the following conditions cumulatively:

- (a) continues to provide telecommunication services or operate the telecommunication network or utilise the assigned spectrum, as the case may be;
- (b) does not default in the payment of any dues under such license, or assignment, including any fees, charges, and other amounts payable under such license or assignment of spectrum; and
- (c) complies with such additional or modified terms and conditions, as may be prescribed.

For the purpose of this Section, a licensee, or assignee shall be considered to be subject to any insolvency proceedings from the “insolvency commencement date” or “pre-packaged insolvency commencement date”, as the case may be, as defined in the Insolvency and Bankruptcy Code, 2016.

- (3) In the event the licensee, or assignee that has become subject to insolvency proceeding, fails to comply with the conditions stated in sub-section (2), then the spectrum, if any, assigned to such entity shall revert to the control of the Central Government, and the Central Government may take such further action, as may be prescribed, which may include allowing such licensee, or assignee to continue to use the spectrum, subject to placing the revenue of such entity in a separate designated account with license fee and charges applicable being paid first in priority during such period.
- (4) The resolution professional appointed under the Insolvency and Bankruptcy Code, 2016 for a licensee, or assignee shall have the obligation to ensure compliance with this Section and shall provide a notice of thirty days to the Central Government prior to the date on which it either expects not to be able to comply with the conditions stated in sub-section (2), or it intends to shut down or suspend, either wholly or in part, the provision of telecommunication services, availability of the telecommunication network or use of spectrum by such licensee, or assignee.
- (5) Upon receipt of a notice under sub-section (4), the Central Government may, in order to ensure (a) national security, (b) consumer interest, or (c) the security, reliability and continued supply of telecommunication services or availability of telecommunication network in India or any part of India, may by notification, direct that the license, or assignment or any identified business or property of a licensee, or assignee, that is subject to such insolvency proceedings, would be

managed by such person or entity, and for such period, as may be notified in this regard.

## **21. Special framework governing defaults in payment by licensees, registered entities or assignees**

In the event there is a default payment by a licensee, registered entity or assignee, of any amount payable under this Act, and the Central Government determines that there exist extraordinary circumstances, including financial stress, consumer interest, maintaining competition in the sector, or reliability and continued supply of telecommunication services or availability of telecommunication network or telecommunication infrastructure in India or any part of India, it may, notwithstanding any other law for the time being in force, by notification, take such measures subject to such terms and conditions as it may deem fit. Such measures may include:

- (a) deferment of the payment of such amounts or part thereof;
- (b) conversion of part or all of the amounts payable by the licensee, registered entity or assignee, into shares in the licensee, registered entity or assignee;
- (c) write-off of such amounts or part thereof; or
- (d) relief from payment of such amounts or part thereof.

## **22. Power to waive fee, interest, additional charges, penalty or grant exceptions**

The Central Government may, with respect to any license, registration or assignment, whether granted prior to, or after the appointed date, under such mitigating circumstances, including, inter alia, interest of consumers, ensuring competition, reliability and continued supply of telecommunication services, or availability of telecommunication network or telecommunication infrastructure in India or any part of India, or any circumstance of public interest or national security, by notification:

- (a) waive in part or full any fee, including entry fees, license fees, registrations fees or any other fees or charges, interest, additional charges or penalty or damages payable by a licensee, registered entity, assignee or a class thereof; or
- (b) grant exceptions from the provisions of this Act or rules to a licensee, registered entity, assignee or a class thereof.

## **Chapter 6: Standards, Public Safety and National Security**

### **23. Power to prescribe standards**

The Central Government may, from time to time, issue standards, as may be prescribed, in respect of:

- (a) telecommunication equipment, telecommunication services, telecommunication network and telecommunication infrastructure;
- (b) manufacturers, importers and distributors of telecommunication equipment; or
- (c) reliability of the provision of any telecommunication services to the public.

### **24. Provisions for Public Emergency or Public Safety**

(1) On the occurrence of any public emergency or in the interest of the public safety, the Central Government or a State Government or any officer specially authorized in this behalf by the Central or a State Government, may, if satisfied that it is necessary or expedient so to do, by notification:

- (a) take temporary possession of any telecommunication services, telecommunication network or telecommunication infrastructure from a licensee or registered entity; or
- (b) provide for a priority call routing scheme to ensure that calls of persons responsible for response and recovery during public emergency, including disaster management, are routed on priority.

(2) On the occurrence of any public emergency or in the interest of the public safety, the Central Government or a State Government or any officer specially authorized in this behalf by the Central or a State Government, may, if satisfied that it is necessary or expedient to do so, in the interest of the sovereignty, integrity or security of India, friendly relations with foreign states, public order, or preventing incitement to an offence, for reasons to be recorded in writing, by order:

- (a) direct that any message or class of messages, to or from any person or class of persons, or relating to any particular subject, brought for transmission by, or transmitted or received by any telecommunication services or telecommunication network, shall not be transmitted, or shall be intercepted or detained or disclosed to the officer mentioned in such order; or

- (b) direct that communications or class of communications to or from any person or class of persons, or relating to any particular subject, transmitted or received by any telecommunication network shall be suspended.
- (3) Press messages intended to be published in India of correspondents accredited to the Central Government or a State Government shall not be intercepted or detained, unless their transmission has been prohibited under sub-clause (a) of sub-section (2).
- (4) The actions specified under sub-section (1), sub-section (2) and sub-section (3) shall be maintained for so long as the public emergency exists or the interests of public safety requires the taking of such action.

## **25. National Security, External Relations or War**

- (1) The Central Government may, may, if satisfied that it is necessary or expedient to do so, in the interest of national security, friendly relations with foreign states, or in the event of war, by notification take such measures as are necessary in the circumstances of the case, including issuing directions in respect of the following:
  - (a) use of telecommunication equipment, telecommunication services, telecommunication network and telecommunication infrastructure;
  - (b) standards applicable to manufacturers, importers and distributors of telecommunication equipment;
  - (c) standards to be adopted by licensees, registered entities or assignees;
  - (d) procurement of telecommunication equipment from notified sources;
  - (e) suspension or prohibition of the use of specified telecommunication equipment from specified countries or specified persons;
  - (f) taking over the control and management of, or suspending the operation of, or entrusting any authority of the Government to manage any or all of any telecommunication services, or any telecommunication network or telecommunication infrastructure connected with such telecommunication services; or
  - (g) take any other action that the Central Government deems expedient to do so in the interest of national security.

## **26. Power to give directions in public interest**

If it appears necessary or expedient to do so in the public interest, the Central Government may direct any licensee to transmit in its telecommunication services or

telecommunication network, specific announcements, in such manner as may be specified.

## **Chapter 7: Telecommunication Development Fund**

### **27. Establishment of Telecommunication Development Fund**

- (1) The Universal Service Obligation Fund created under the Indian Telegraph Act, 1885, shall, from the appointed date, be referred to as the “Telecommunication Development Fund”, which shall be under the control of the Central Government, and shall discharge functions as set forth in this Act and terms and conditions as may be prescribed.
- (2) The following amounts shall be credited to the Telecommunication Development Fund
  - (a) any sums of money paid under Section 28;
  - (b) any grants and loans made by the Central Government under Section 30.
- (3) The balance to the credit of the Telecommunication Development Fund shall not lapse at the end of the financial year.

### **28. Payment of contribution by licensee, registered entity or assignee**

The payments made, if any, for the grant of a license, registration or assignment under Section 4 and Section 5 shall include such sum attributable to the Telecommunication Development Fund, as may be determined by the Central Government. All amounts payable under licenses granted prior to the appointed date towards the Universal Service Obligation, shall be deemed to mean amounts payable towards the Telecommunication Development Fund.

### **29. Crediting of sum to Consolidated Fund of India**

The sums of money received towards the Telecommunication Development Fund under Section 27, shall first be credited to the Consolidated Fund of India, which shall be appropriated by the Central Government, in accordance with law made by the Parliament, to the Telecommunication Development Fund from time to time for being utilised to meet any or all of the following objectives:

- (a) support universal service through promoting access to and delivery of telecommunication services in underserved rural, remote and urban areas;

- (b) research and development of new telecommunication services, technologies, and products;
- (c) support skill development and training in telecommunication;
- (d) support pilot projects, consultancy assistance and advisory support towards provision of universal service under sub-clause (a) of this Section; and
- (e) support introduction of new telecommunication services, technologies, and products.

### **30. Grants and loans by the Central Government**

The Central Government may, after due appropriation made by Parliament by law in this behalf, credit by way of grants and loans such sums of money as the Central Government may consider necessary to the Telecommunication Development Fund.

### **31. Administration of Fund**

The Telecommunication Development Fund shall be administered in a manner, as may be prescribed.

## **Chapter 8: Innovation and Technology Development**

### **32. Regulatory Sandbox**

The Central Government may, for the purpose of encouraging and facilitating innovation and technological development in telecommunication, create a Regulatory Sandbox, in such manner as may be prescribed.

For the purpose of this sub-section, “**Regulatory Sandbox**” shall mean a framework of special terms and conditions of a license, registration, authorization or assignment that allows persons to conduct live testing of products and services in a controlled environment under the supervision of the Central Government.

## **Chapter 9: Protection of users**

### **33. Measures for protection of users**

- (1) For the purpose of this Section, “**specified message**” means any message offering, advertising or promoting goods, services, interest in property, business opportunity, employment opportunity or investment opportunity, whether or not –
  - (a) the goods, services, interest, or opportunity are real or fictitious; or

- (b) it is lawful to acquire such goods, services, property, interest or take up the opportunity.
- (2) The Central Government may prescribe the measures for protection of users from specified messages. Such measures may include measures relating to:
- (a) the prior consent of users for receiving certain messages or class of messages;
  - (b) the preparation and maintenance of one or more registers, to be called as “Do Not Disturb” register, to ensure that users do not receive specified messages without prior consent; or
  - (c) the mechanism to enable users to report specified messages received in contravention of this Section.

#### **34. Duty of users**

In the interest of the sovereignty, integrity or security of India, friendly relations with foreign states, public order, or preventing incitement to an offence, no user shall furnish any false particulars, suppress any material information or impersonate another person while establishing identity for availing telecommunication services.

### **Chapter 10: Miscellaneous**

#### **35. Creation of security interests**

The Central Government may prescribe the security interest that a licensee or a registered entity can provide to lenders financing such entities, and the terms and conditions of such security interest.

#### **36. Certification of persons for operation of wireless equipment on a vessel or aircraft**

The Central Government may grant certification to any person to operate a wireless equipment on such class of vessels registered under the Merchant Shipping Act, 1958, aircrafts registered under the Aircrafts Act, 1934 and any other category of vessels or vehicles as may be notified by the Central Government, in accordance with the terms and conditions, including applicable fees and charges, as may be prescribed.

### **37. Certification for amateur station operator**

The Central Government may prescribe through rules the manner of certification of persons to install and operate an amateur station. Such rules may specify the qualification of and terms and conditions subject to which, a certification for operating an amateur station may be granted, including through conduct of examinations for granting such certification, the fees and charges to be paid thereof, and other connected matters.

For the purposes of this Section:

“**amateur services**” means radiocommunication services for the purpose of self-training, intercommunication and technical investigations carried out by amateurs, that is, by duly authorized persons interested in radio technique solely with a personal aim and without any pecuniary interest;

“**amateur station**” means a station operated by an amateur for amateur services.

### **38. Civil liability**

The Central Government may prescribe civil liabilities, including compensation payable by any person causing damage to telecommunication network or telecommunication infrastructure, to the licensee or registered entity, as the case may be, and the applicable penalties.

### **39. Protection of action taken in good faith**

No suit, prosecution or other legal proceeding shall lie against the Central Government, the State Government, the Government of a Union Territory, or any other authority under this Act or any person acting on their behalf as the case may be, for anything which is done in good faith, or intended to be done in pursuance of this Act or any rule, regulation or order made thereunder.

### **40. Act to have overriding effect**

The provisions of this Act shall have effect notwithstanding anything inconsistent therewith contained in any other law for the time being in force or in any instrument having effect by virtue of any law for the time being in force other than this Act.

#### **41. Power to make rules**

- (1) The Central Government may, by notification, make rules for carrying out the purposes of this Act, including any matter which is to be or may be prescribed, in respect of which provision is to be made by rules under this Act.
- (2) Every rule made under this Act shall be laid, as soon as may be after it is made, before each House of Parliament, while it is in session, for a total period of thirty (30) days which may be comprised in one session or in two or more successive sessions, and if, before the expiry of the session immediately following the session or the successive sessions aforesaid, both Houses agree in making any modification in the rule or both Houses agree that the rule should not be made, the rule shall thereafter have effect only in such modified form or be of no effect, as the case may be. However, any such modification or annulment shall be without prejudice to the validity of anything previously done under that rule.

#### **42. Power of Central Government to amend Schedules**

- (1) Subject to the provisions of this Section, the Central Government may, by notification, alter any of the Schedules to this Act, except for Schedule 3, alterations to which can only be undertaken through an amendment of this Act.
- (2) Any alteration notified under sub-section (1) shall have effect as if enacted in this Act and shall come into force on the date of the notification, unless the notification otherwise directs.
- (3) Every alteration made by the Central Government under sub-section (1) shall be laid as soon as may be after it is made before each House of Parliament, while it is in session, for a total period of thirty (30) days which may be comprised in one session or in two or more successive sessions, and if, before the expiry of the session immediately following the session or the successive sessions aforesaid, both Houses agree in making any modification in the alteration, or both Houses agree that the alteration should not be made, the alteration shall thereafter have effect only in such modified form or be of no effect, as the case may be. However, any such modification or annulment shall be without prejudice to the validity of anything previously done in pursuance of that alteration.

#### **43. Power to remove difficulties**

- (1) If any difficulty arises in giving effect to the provisions of this Act, the Central Government may, before the expiry of three years from the date of commencement of this Act, by order published in the Official Gazette, make such provisions, not inconsistent with the provisions of this Act, as may be necessary or expedient, for removing the difficulty.
- (2) Every order made under this Section shall, as soon as may be after it is made, be laid before each House of Parliament.

#### **44. Rights in the Continental Shelf and Exclusive Economic Zone**

The privilege of the Central Government to grant licenses, registrations or assignment under this Act in the Continental Shelf and the Exclusive Economic Zone of India and the rights of a licensee, registered entity or assignee, as the case may be, shall be subject to the Territorial Waters, Continental Shelf, Exclusive Economic Zone and other Maritime Zones Act, 1976, and applicable international laws as accepted and ratified by India.

#### **45. Validation of certain acts and indemnity**

All acts of executive authority done, decisions, actions, proceedings taken and orders passed, prior to the appointed date, by the Central Government, any officer of the Central Government, or by any other authority, with respect to assignment of spectrum or provision of telecommunication services, or telecommunication network or establishment of telecommunication infrastructure, in the belief or purported belief that the acts done, decisions, actions, and proceedings taken, were being done, taken or passed under the Indian Telegraph Act, 1885, the Indian Wireless Telegraphy Act, 1933 or the Telegraph Wires (Unlawful Possession) Act, 1950, shall be as valid and operative as if they had been done, taken or passed in accordance with law; and no suit or other legal proceeding shall be maintained or continued against any person whatsoever, on the ground that any such acts, decisions, proceedings taken were not done or taken in accordance with law.

#### **46. Amendment to Act 24 of 1997**

In the Telecom Regulatory Authority of India Act, 1997:

- (a) In section 2, in sub-section (1), in clause (e), the following clause shall be substituted: “licensee” means a licensee defined under the Indian Telecommunication Act, 2022.
- (b) In section 2, in sub-section (1), in clause (ea), the following clause shall be substituted: “licensor” means “the Central Government which grants a license, registration or assignment under the Indian Telecommunication Act, 2022”.
- (c) In section 2, in sub-section (2), for the words “the Indian Telegraph Act, 1885 (13 of 1885) or the Indian Wireless Telegraphy Act, 1933 (17 of 1933), shall have the meanings respectively assigned to them in those Acts”, words and figures “the Indian Telecommunication Act, 2022 shall have the meaning assigned to them in that Act” shall be substituted.
- (d) In section 4, the proviso shall be omitted.
- (e) In section 11, in sub-section (1) for the words “Notwithstanding anything contained in the Indian Telegraph Act, 1885 (13 of 1885)”, the words “In consonance with the Indian Telecommunication Act, 2022” shall be substituted.
- (f) In section 11, the second proviso to sub-section (1) is hereby deleted.
- (g) In section 11, the third proviso to sub-section (1) is hereby deleted.
- (h) In section 11, the fourth proviso to sub-section (1) is hereby deleted.
- (i) In section 11, the fifth proviso to sub-section (1) is hereby deleted.
- (j) In section 11, in sub-section (2), for the words “Notwithstanding anything contained in the Indian Telegraph Act, 1885 (13 of 1885)”, the words “In consonance with the Indian Telecommunication Act, 2022” shall be substituted.
- (k) In section 11, in sub-section (2), after the proviso, the words “Provided further that the Authority may direct a licensee or class of licensees to abstain from predatory pricing that is harmful to the overall health of the telecommunication sector, competition, long term development and fair market mechanism” shall be inserted.
- (l) In section 14, in clause (a), proviso (C) shall be omitted.

- (m) In section 38, the following section shall be substituted “The provisions of this Act shall be in addition to the provisions of the Indian Telecommunication Act, 2022 and, in particular, nothing in this Act shall affect any jurisdiction, powers and functions required to be exercised or performed by the appropriate authority in relation to any area falling within the jurisdiction of such authority”.

## **Chapter 11: Offences**

### **47. General provisions related to offences**

- (1) Any person or entity committing any offence listed in Schedule 3 shall be punished with fine or imprisonment, or through suspension of telecommunication service, or through a combination thereof, as specified in Schedule 3. The provisions of Schedule 3 shall apply to the abetment of, or attempt to commit, an offence as they apply to the offence.
- (2) Notwithstanding anything contained in the Code of Criminal Procedure, 1973, all offences under this Act shall be bailable, and shall be cognizable or non-cognizable as provided under Schedule 3.
- (3) No court shall take cognizance of any non-cognizable offence punishable under this Act or the rules or regulations made thereunder, save on a complaint made by the Central Government or the competent authority as may be notified by the Central Government in this regard.
- (4) No court inferior to that of a Chief Metropolitan Magistrate or a Chief Judicial Magistrate of first class shall try any offence punishable under this Act.

### **48. Offences by companies**

If the person committing an offence under this Act is a company, the employee(s) who at the time the offence was committed, was responsible to the company for the conduct of the business relating to the offence, shall be liable to be proceeded against and punished accordingly.

For the purposes of this Section-

“**company**” means a body corporate and includes a firm or other association of individuals;

“**employee**” excludes a person appointed as an Independent Director on the Board of Directors of the company.

#### **49. Compounding of offences**

- (1) Notwithstanding anything contained in the Code of Criminal Procedure, 1973, only such offences as identified to be compoundable in Schedule 3, may be compounded either before or after the institution of any prosecution. Compounding of such offences shall be in accordance with the procedure and on payment by the person committing the offence, of such sum, as the Central Government may prescribe. In the case of an offence punishable with fine only, no such sum shall exceed one hundred and fifty percent of the maximum amount of fine which may be imposed for that offence.
- (2) Where an offence is compounded under sub-section (1), no proceeding shall be taken against the offender in respect of the offence so compounded, and the offender, if in custody, shall be released forthwith.
- (3) When an offence is compoundable under this Section, the abetment of such offence or an attempt to commit such offence, may be compounded in like manner.
- (4) When the accused has been committed for trial or when he has been convicted and an appeal is pending, no composition for the offence shall be allowed without the leave of the court to which he is committed, or as the case may be, before which the appeal is to be heard.
- (5) The composition of an offence under this Section shall have the effect of an acquittal of the accused.

#### **50. Power of search**

Any officer authorized by the Central Government in this behalf, may search any building, vehicle, vessel, aircraft or place in which he has reason to believe that any unauthorized telecommunication network or telecommunication equipment or wireless equipment in respect of which an offence punishable under Section 47 has been committed, is kept or concealed, and take possession thereof.

## **51. Supply of information to authorized officers**

Notwithstanding anything contained in any law for the time being in force, where the Central Government, a State Government or a Government of a Union Territory is satisfied that any information, document or record in possession or control of any licensee, registered entity or assignee relating to any telecommunication services, telecommunication network, telecommunication infrastructure or use of spectrum, availed of by any entity or consumer or subscriber is necessary to be furnished in relation to any pending or apprehended civil or criminal proceedings, an officer, specially authorized in writing by such Government in this behalf, shall direct such licensee, registered entity or assignee to furnish such information, document or record to him and the licensee, registered entity or assignee shall comply with the direction of such officer.

## **Chapter 12: Repeal and Savings**

### **52. Repeal of certain Acts, saving of licenses, registrations or assignments and dissolution of certain authorities**

- (1) Subject to the other provisions of this Section, the enactments namely, the Indian Telegraph Act, 1885, the Indian Wireless Telegraphy Act, 1933 and the Telegraph Wires (Unlawful Possession) Act, 1950, are hereby repealed.
- (2) Notwithstanding the repeal of the provisions aforesaid, anything done or any action taken including any grant of license, registration or assignment, any order, or proceeding, pending or ongoing, under the repealed provisions shall be deemed to have been done or taken under this Act, and the provisions of this Act shall have effect in relation thereto.

### **53. Existing rules to continue**

All rules, guidelines or administrative orders, made or purported to have been made under the Indian Telegraph Act, 1885 or under the Indian Wireless Telegraphy Act, 1933, or under the Telegraph Wires (Unlawful Possession) Act, 1950, shall, in so far as they relate to matters for which provision is made in this Act and are not inconsistent therewith, be deemed to have been made under this Act as if this Act had been in force on the date on which such rules, guidelines or administrative orders were made, and shall continue in force unless and until they are superseded by any rules made under this Act.

\*\*\*

**Schedule – 1: Spectrum assignment for Governmental functions or purposes in view of public interest or necessity**

1. National security and defence.
2. Law enforcement and crime prevention.
3. Public broadcasting by Prasar Bharati.
4. Disaster management, safeguarding life and property.
5. Promoting scientific research, resource development, and exploration.
6. Safety and operation of roads, railways, metro, regional rail, inland waterways, air, pipelines, shipping, and other transport systems.
7. Conservation of natural resources and wildlife.
8. Meteorological department and weather forecasting.
9. Internationally recognized dedicated bands for amateur stations, navigation, telemetry, and other like usages.
10. Use by Central/State Government/ their entities or other licensed entities for safety and operations of mines, ports and oil exploration and such other activities where the use of spectrum is primarily for supporting the safety and operations.
11. Public Mobile Radio Trunking Services.
12. Radio backhaul for telecommunication services.  
*Explanation: The term “radio backhaul” shall mean the use of radio frequency only to interconnect telecommunication equipment, other than the customer equipment in telecommunication networks.*
13. Community Radio Stations.
14. Space research and application.
15. Certain satellite-based services such as: Teleports, Direct To Home (DTH), Digital Satellite News Gathering (DSNG), Very Small Aperture Terminal (VSAT), National Long Distance (NLD), International Long Distance (ILD), Mobile Satellite Service (MSS) in L and S bands.
16. Use by central/state government or their authorized agencies for telecommunication services.
17. Bharat Sanchar Nigam Limited (BSNL) and Mahanagar Telephone Network Limited (MTNL).
18. Testing, trial, experimental, demonstration purposes for enabling implementation of new technologies.
19. Any other function or purpose determined by the Central Government to be included under this Schedule.

## **Schedule – 2: Broadcasting services requiring license as of the Appointed Date**

1. Direct to Home (DTH) Services.
2. Community Radio Stations.
3. FM Radio Broadcasting Services through Private Agencies.
4. Internet Protocol Television (IPTV) Services.
5. Downlinking of Television Channels.
6. Uplinking of Television Channels.

### Schedule – 3: Offences and Penalties

S. No.	Offence under the Act	Penalty	Cognizable or Non-cognizable	Compoundable or Non-compoundable
1	Providing telecommunication services or establishing telecommunication network without a license under sub-section (1) of Section 4.	Imprisonment for a term which may extend to one year, or with fine up to rupees fifty lakhs, or both.	Cognizable	Non-compoundable
2	Gaining or attempting to gain, directly or indirectly, (a) unauthorized access to a telecommunication network or (b) intercepting a message unlawfully.	Imprisonment for a term which may extend to one year, or with fine up to rupees fifty lakhs, or suspension of telecommunication service, or a combination thereof.	Cognizable	Non-compoundable
3	Wilful contravention that is detrimental to national security under Section 25.	Imprisonment for a term which may extend to three years, or with fine up to rupees one crore, or suspension of telecommunication service, or a combination thereof.	Cognizable	Non-compoundable
4	Possessing or use of any equipment that blocks telecommunication without an authorization.	Imprisonment for a term which may extend to three years, or with fine up to rupees fifty lakhs or	Cognizable	Compoundable

<b>S. No.</b>	<b>Offence under the Act</b>	<b>Penalty</b>	<b>Cognizable or Non-cognizable</b>	<b>Compoundable or Non-compoundable</b>
		suspension of telecommunication service, or a combination thereof.		
5	Wilfully removing or tampering with or causing damage to telecommunication infrastructure or telecommunication network.	Imprisonment for a term which may extend to one year, or with fine up to rupees one crore, or both.	Cognizable	Compoundable
6	Causing damage through negligence to telecommunication infrastructure or telecommunication network.	Fine up to rupees fifty lakhs	Non-cognizable	Compoundable
7	Possessing wireless equipment without an authorization or exemption.	First Offence: Fine up to rupees fifty thousand. Each subsequent offence: Fine up to rupees two lakhs for each such instance	Non-cognizable	Compoundable
8	Use by any person or entity of a telecommunication service, telecommunication network or telecommunication infrastructure knowing or having reason to believe that such telecommunication service,	Fine up to rupees one lakh.	Non-cognizable	Compoundable

<b>S. No.</b>	<b>Offence under the Act</b>	<b>Penalty</b>	<b>Cognizable or Non-cognizable</b>	<b>Compoundable or Non-compoundable</b>
	telecommunication network or telecommunication infrastructure does not have the required license or registration under this Act.			
9	Impersonating authorized personnel of licensee, registered entity or assignee to perpetrate fraud.	Imprisonment for a term which may extend to three years, or with fine up to rupees fifty lakhs or suspension of telecommunication service, or a combination thereof.	Cognizable	Non-compoundable
10	Contravention of the provisions of Section 33.	First Offence: Fine up to rupees fifty thousand. Each subsequent offence: Fine up to rupees two lakhs for each such instance, or suspension of telecommunication service, or a combination thereof.	Non-cognizable	Compoundable
11	Misrepresentation of identity as required under sub-section 7, Section 4 by a person availing telecommunication services.	Imprisonment for a term which may extend to one year, or with fine up to rupees fifty thousand, or suspension of telecommunication	Cognizable	Compoundable

S. No.	Offence under the Act	Penalty	Cognizable or Non-cognizable	Compoundable or Non-compoundable
		service, or a combination thereof.		
12	Contravention of any provision of this Act, or rules, or any condition, limitation or restriction subject to which any license, registration, assignment, authorization, direction or exemption in relation to any matter under this Act, has been granted or accorded, and for which no penalty or punishment is provided elsewhere in this Act.	First offence: Fine up to rupees twenty five thousand. Second or subsequent offence: Further fine up to rupees fifty thousand for every day after the first during which the contravention continues.	Non-cognizable	Compoundable

**Schedule – 4: Penalties for breach of terms and conditions**

<b>Categorization</b>	<b>Penalty</b>
Severe	Penalty up to Rs 5 Cr
Major	Penalty up to Rs 1 Cr
Moderate	Penalty up to Rs 10 Lakh
Minor	Penalty up to Rs 1 Lakh
Non-severe	Written warning

## **Schedule – 5: Telecommunication Infrastructure**

1. Telecommunication lines, including wire or wires used for the purpose of telecommunication, including copper cables, optical fibre cables and submarine cables, with any casing, coating, tube, or pipe enclosing the same, any appliances and equipment connected therewith for the purpose of fixing or insulating the same.
2. Posts.
3. Telecommunication towers by whatever name called (including mobile towers).
4. Ducts.
5. Conduits.
6. Cable corridors.
7. Any civil, electrical, or mechanical infrastructure used or capable for use for telecommunication as may be notified by the Central Government from time to time.
