While it is notable to indicate the number of speakers of each language that come from a particular state, it is also relevant to indicate the percentage of the speakers of a given language that live in a particular state.

If each state in the nation were to have a percentage of a language population equal to its percentage of the total population, we would assume that California would be home to 11.97 percent of the speakers of each language, Texas to 7.33 percent, and Wyoming to 0.18 percent, as is displayed in a table at the end of this section. However, linguistic equality between states is not the case.

For example, 26.42 percent of the speakers of African live in New York, nearly four times the percentage of all Americans age five and above that call the Empire State home (6.76 percent). Similarly, while Rhode Island may only be home to 0.66 percent of the African speaking population, this figure is more than 1-1/2 times larger than the percentage of all Americans who are Rhode Islanders (0.38 percent).

Similarly, while California's tally of 7.79 percent of the African speaking population may seem high, it is actually lower than what we would assume if California's share of African speakers was equivalent to its share of the entire population.

Also given is the percentage of the population that lives in each of the four "regions" and nine "divisions" of the nation, as established by the U.S. Census Bureau. The regions are:

- \* Midwest, made up of the East North Central Division (Illinois, Indiana, Michigan, Ohio and Wisconsin) and the West North Central Division (Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota and South Dakota)
- \* Northeast, made up of the New England Division (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont) and the Middle Atlantic Division (New Jersey, New York, and Pennslyvania)
- \* South, made up of the East South Central Division (Alabama, Kentucky, Mississippi and Tennessee), the South Atlantic Division (Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia and West Virginia) and the West South Central Division (Arkansas, Louisiana, Oklahoma and Texas)
- \* West, made up of the Mountain Division (Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah and Wyoming) and the Pacific Division (Alaska, California, Hawaii, Oregon and Washington).
