

Errata to
ASHRAE Design Guide for Tall, Supertall, and Megatall Building Systems, Second Edition
(2020)

August 6, 2020

- Page 66:** Z and H are not defined as variables. They should be as follows:
 Z = altitude
 H = height, see Equations 5.4a and 5.4b
- Page 69:** The images in Figures 5.3 and 5.4 are flipped. The image for Figure 5.3 corresponds to the caption in Figure 5.4 and vice versa.
- Page 117:** The conversion between Fahrenheit and Celsius should be the change in absolute temperature, where 1.8°F is equal to 1°C.
- Page 119:** As an informative note, there are a few heat recovery VRF systems that use two pipes.
- Page 120:** Read the “primary air” requirement of VAV systems as “*approximately* 10 times more primary air”
- Page 122:** For clarity, remove the words “bid and” from the sentence beginning “Number of FCU is bid and distributed...”
- Page 122:** The word “fist” should be “first.”
- Page 228:** For clarity, the reference to “Figure 10” in this section is referring to Figure 10 in the quoted source document.
