30-day Public Review from August 7, 2020 to September 6, 2020

- ♦ **1st Public Review of BSR/ASHRAE Addendum d to ANSI/ASHRAE Standard 62.2-2019, *Ventilation and Acceptable Indoor Air Quality in Residential Buildings***

This proposed addendum replaces the current definition of “readily accessible” with a new definition that is intended to be less ambiguous and more compatible with building codes. The replaced definition of “readily accessible” is directly from the 2020 National Electrical Code (NEC). It also creates a new definition for “accessible” and makes edits in the standard to refer to one of the two definitions, where needed.

- ♦ **2nd ISC Public Review of BSR/ASHRAE Standard 64-2011R, *Methods of Laboratory Testing Remote Mechanical-Draft Evaporative Refrigerant Condensers***

This revision of Standard 64 prescribes methods of laboratory testing remote mechanical-draft evaporative refrigerant condensers. Technical revisions have been incorporated as appropriate. Additional revisions have been implemented to bring this standard into compliance with ASHRAE’s mandatory language requirements. References have been updated.

- ♦ **1st Public Review of BSR/ASHRAE Addendum d to ANSI/ASHRAE Standard 188-2018, *Legionellosis: Risk Management for Building Water Systems***

This addendum adds a definition of shall for use in this mandatory standard. It also includes changes to the commissioning section and to the associated references to

remove references to documents that have been noted by the issuing organization (AWWA) not to apply to building water systems. The reference to ASHRAE Guideline 12 has been updated to include the new 2020 version of the guideline.

- ♦ **2nd Public Review ISC of BSR/ASHRAE Addendum a to ANSI/ASHRAE Standard 90.4-2019, *Energy Standard for Data Centers***

Addendum a was written to clarify existing requirements in Section 6.5 as well as introduce new provisions to encourage heat recovery within data centers. Additional improvements were identified during the 1st public review, which have been included in this ISC.

- ♦ **2nd Public Review ISC of BSR/ASHRAE Addendum b to ANSI/ASHRAE Standard 90.4-2019, *Energy Standard for Data Centers***

Addendum b was written to clarify existing requirements in Sections 6 and 11 and to provide guidance for taking credit for renewable energy systems. Additional improvements were identified during the 1st public review, which have been included in this ISC.

- ♦ **2nd Public Review ISC of BSR/ASHRAE Addendum d to ANSI/ASHRAE Standard 90.4-2019, *Energy Standard for Data Centers***

Addendum d provides clarifications about the use of Diesel-Rotary UPS Systems (DRUPS) and how they are accounted for in the Electrical Loss Component (ELC). Additional changes were made to Sections 11 and 12 to include the latest values and references available. The subsequent ISC is being issued to make additional improvements in language as well as a correction to one of the references.
