**30-day Public Review from
January 12, 2024 to February 11, 2023**

- ♦ **1st Public Review of BSR/ASHRAE/ICC/USGBC/IES Addendum c to ANSI/ASHRAE/ICC/USGBC/IES Standard 189.1-2023, *Standard for the Design of High-Performance Green Buildings Except Low-Rise Residential Buildings***

This addendum adds an exception which clarifies the intent of the section to not include parking for pick-up, drop-off, or any designated limit of 30 minutes or less in the total number of on-site parking spaces. An electric vehicle will gain between 11 and 31 miles of driving range per hour of Level 2 charging (208/240V) depending on available amperage. Short-term parking (not more than 30 minutes) may not provide sufficient charging time for Level 2 charging, depending on the vehicle battery capacity and intended duration of travel.
