PUBLIC REVIEW—CALL FOR COMMENTS

Constructive comments are invited for the following Public Review Drafts, which can be accessed on ASHRAE's website at <https://www.ashrae.org/technical-resources/standards-and-guidelines/public-review-drafts>. All activity for reviewing and commenting on public review drafts can be accomplished completely online. To obtain a paper copy of any Public Review Draft contact ASHRAE, Inc. Attn: Standards Public Review, 180 Technology Parkway, Peachtree Corners, GA 30092, or via email at: standards.section@ashrae.org. **Note: Paper copies are available for \$35.00/copy if 100 pages or less and \$45.00 if over 100 pages.**

30-day Public Review from
July 21, 2023, to August 20, 2023

- ♦ **1st Publication Public Review of BSR/ASHRAE Addendum *e* to ANSI/ASHRAE Standard 15-2022, *Safety Standard for Refrigeration Systems***

This proposed addendum removes the terms “human comfort” and “other than human comfort” from the standard, as these terms are both undefined and do not adequately describe the types of systems that are intended to cover. Sections 7.5, 7.6, 7.7, and 7.8 are rewritten to clarify the specific application types that they pertain to, and to be more consistent in their approach. Informative notes are also added to provide more context on the product safety standards and equipment types in question.

- ♦ **BSR/ASHRAE Addendum *a* to Standard 160-2021, *Control Design Analysis in Buildings* (First Public Review Draft)**

The purpose of Addendum *a* to Standard 160-2021 is to improve the organization and clarity of Section 7 (Reporting) of Standard 160-2021 and add commentary that references ASTM E3054/E3054M – 16.

45-day Public Review from
July 21, 2023, to September 4, 2023

- ♦ **BSR/ASHRAE/ASPE/AWWA Standard 191P, *Standard for the Efficient Use of Water in Building Mechanical Systems* (Fourth ISC Public Review Draft)**

The purpose of ASHRAE Standard 191P is to document a comprehensive water balance and define baseline requirements for the efficient use of *water in* mechanical and process systems.
