- ♦ **Guideline 1.7P, *Ongoing Commissioning Process for Buildings, Systems and Assemblies***

### PURPOSE:

The purpose of this guideline is to describe an Ongoing Commissioning Process (OCx) for existing buildings, systems, and assemblies that have completed the new building or existing building commissioning process using the principles developed in ASHRAE Standards and Guidelines. This OCx process is intended to maintain and improve the facility operations performance achieved by the previous commissioning and continue to meet the current facility requirements.

### 2. SCOPE:

2.1 This guideline applies only to existing buildings, systems, and/or assemblies that were previously commissioned.

2.2 This guideline addresses the following:

- Overview of Ongoing Commissioning Process (OCx) activities
- Assembly of the OCx Team, review of the current facility requirements (CFR), and development of the OCx Plan.
- Implementation of system/assembly performance measurements and verification processes.
- Assessment of achievement of the CFR.
- Investigation of unacceptable performance outcomes.
- Development and implementation of tune-up recommendations and reverification.
- Updating of the Systems Manual.

♦ **BSR/ASHRAE Standard 185.3P, Method of Testing In-Room Devices and Systems for Microorganism Removal or Inactivation in a Chamber**

**PURPOSE:**

The standard establishes a method of test for evaluating in-room devices and systems for microorganism removal or inactivation in a chamber.

**2. SCOPE:**

2.1. The method of test specifies selected indicator microorganisms in the test chamber and defines procedures for generating the bioaerosols required for the method of test.

2.2 This standard provides a method for counting the number of viable microorganisms in the chamber to calculate the elimination efficiency for each microorganism.

2.3 This standard establishes minimum performance specifications for the equipment required to conduct the tests, defines methods of calculating and reporting results obtained from the test data, and establishes a reporting system to be applied to in-room devices and systems covered herein.

2.4 This standard does not address the health and safety effects of operating devices and systems in an occupied room.
