All activity for reviewing and commenting on public review drafts can be accomplished completely online. To obtain a paper copy of any Public Review Draft contact ASHRAE, Inc. Attn: Standards Public Review, 180 Technology Parkway, Peachtree Corners, GA 30092, or via email at: standards.section@ashrae.org. **Note: Paper copies are available for \$35.00/copy if 100 pages or less and \$45.00 if over 100 pages.**

45 Day Public Review **March 4, 2022 to April 18, 2022**

30-day Public Review from **March 4, 2022 to April 3, 2022**

- ♦ **2nd ISC Public Review of BSR/ASHRAE Addendum g to ANSI/ASHRAE Standard 15-2019, *Safety Standard for Refrigeration Systems***

Draft addendum g to ANSI/ASHRAE Standard 15-2019 proposes a complete rewrite of Section 7.2, "Concentration Limits," and Section 7.3, "Volume Calculations." This second PPR (Independent Substantive Change) proposes modifications based upon comments submitted during the previous public review.

- ♦ **2nd Public Review of BSR/ASHRAE Addendum i to ANSI/ASHRAE Standard 62.2-2019, *Ventilation and Acceptable Indoor Air Quality in Residential Buildings***

Ozone and similar reactive oxygen species are hazardous both directly and through the indoor chemistry they promote. Some air-cleaning systems may produce ozone intentionally or incidentally. By reference to 62.1, this proposed addendum establishes minimum requirements for ozone emissions of air-cleaning systems that incorporate ultraviolet light or the creation of charged particles, ions, or free radicals.

- ♦ **1st Public Review of BSR/ASHRAE Addendum L to ANSI/ASHRAE Standard 62.2-2019, *Ventilation and Acceptable Indoor Air Quality in Residential Buildings***

This proposed addendum consolidates the operation requirements of the standard into one section, adds a requirement for systems to be maintained, and clarifies that operations and maintenance instructions must be provided via a manual meeting minimum requirements.

- ♦ **1st Public Review of BSR/ASHRAE Addendum g to ANSI/ASHRAE Standard 55-2020, *Thermal Environmental Conditions for Human Occupancy***

Proposed Addendum g makes changes to the definition of the SET temperature and to the SET code to align with international standards.

- ♦ **2nd Public Review of BSR/ASHRAE Addendum h to ANSI/ASHRAE Standard 62.2-2019, *Ventilation and Acceptable Indoor Air Quality in Residential Buildings***

This proposed addendum is intended to make the standard more consistent in the language used in the text and to more appropriately arrange and organize several sections of the standard. In addition, several changes have been made to better accommodate multi-family applications of the standard, such as the inclusion of a definition of "corridor" and consistent use of the term "dwelling unit". Where terms are no longer used in the standard, definitions have been removed.
