Attn: Standards Public Review, 180 Technology Parkway, Peachtree Corners, GA 30092, or via email at: [standards.section@ashrae.org](mailto:standards.section@ashrae.org). **Note: Paper copies are available for \$35.00/copy if 100 pages or less and \$45.00 if over 100 pages.**

**30-day Public Review from  
November 25, 2022 to December 25, 2023**

- ♦ **1st Public Review of BSR/ASHRAE/ICC/USGBC/IES Addendum *af* to ANSI/ASHRAE/ICC/USGBC/IES Standard 189.1-2020, *Standard for the Design of High-Performance Green Buildings Except Low-Rise Residential Buildings***

This addendum requires provision of minimal conduit and electrical distribution space today to allow conversion of parking spaces without the need for excavation as demand for charging equipment increases. It does not require any increase in the number of charging spaces or parking spaces with wiring installed (EV-ready spaces), only conduit to allow wire to be pulled as needed in the future. For parking garages, it does not require conduit to each parking space, only conduit through walls and other obstructions such that wiring to future surface-mounted conduit can be provided easily. Note that Sections 5.3.7.3.1 and 5.3.7.1.2 both include a sentence about rounding up to find the required number of spaces. This addendum deletes these sentences as they are not needed
