

# DECARBONIZE WITHOUT COMPROMISE

## OUR NO-COMPROMISE COMMITMENTS HELP YOU MEET LOW-CARBON BUILDING GOALS—ANYWHERE.

REDUCING CO2 CONTENT SHOULDN'T COME AT THE COST OF CONSIDERATIONS THAT DRIVE YOUR PROJECTS.

Holcim low-carbon solutions enable decarbonization in construction at scale, without compromising on the things that matter most.

### ALL THE DURABILITY

Holcim low-carbon building materials are tested and certified to key standards like ACI 318. In fact, our entire suite of green building solutions routinely improves durability in many applications.

### ALL THE FLEXIBILITY

Whether you're building infrastructure, commercial structures or residential projects, Holcim low-carbon materials help reduce CO2 by at least 30%.

### ALL THE AMBITION

No matter how large the project, our range of sustainable building products enables low-carbon construction at scale. And our expertise allows us to deliver those solutions tailored to your specifications.

### ALL THE VISION

Change how you build, not what you build. Our project partner teams have the experience and tools to help you understand how your original designs and vision can be realized with low-carbon building materials.

### ALL THE RECOGNITION

Holcim low-carbon building solutions have helped architects, contractors and owners earn numerous awards, including LEED®, BREEAM® and HQE® green-building certifications.

## WITH AT LEAST 30% LESS CO2

OUR INNOVATIVE BUILDING PRODUCTS ARE LEADING THE SECTOR IN DECARBONIZATION AND ARE DESIGNED TO MEET THE DEMANDS OF YOUR PROJECT.

### ECOPACT CONCRETE

Reduces embodied carbon of construction by at least 30% with equal or better properties than conventional concrete. Available in a wide variety of strength classes compliant with industry standards.

### ECOPLANET CEMENT

Delivers at least 30% lower carbon footprint with equal or superior performance than Type II, helping to lower energy consumption and greenhouse gas emissions.

## ONE CHANGE MAKES A WORLD OF DIFFERENCE

No matter what you build, our sustainable building solutions deliver value, performance and beauty with less CO2.
