OVERVIEW

NeuStar proposes the implementation of a fully automated, EPF-compliant Redemption Grace Period (RGF) for .US domain names. The NeuStar RGP will enable Registrars to restore registered .US domain names that have been inadvertently deleted through registrant or Registrar error, but which are still within a designated 30-day Redemption Period.

STATUSES

In order to remain EPP-compliant, NeuStar will only use domain statuses defined in the current EPP specifications. As such, all domains slated for dejetion will remain in PendingDelete status for 35 days or until they are restored.

- All domains deleted outside the Add Grace Period will be placed on PendingDelete status for a total of 35 days, after which time the
 names will be purged from the Registry database and made available again for registration.
- During this PendingDelete timeframe, domain names will only be redesmable for the first 30 days, and cannot be otherwise modified.
 The only action allowed by the Registrar is the restoration of the domain name.
- Upon being placed in PendingDelete status, domain names will be immediately removed from the DNS, but will remain in the WHOIS with a notation about their dates of deletion in the "Lest Updated Date" field.
- At the conclusion of the 30-day restoration period, the domain will remain on PendingDelate for an additional five days. During this
 time, the domain cannot be restored, modified, deleted, or transferred. At the conclusion of this five-day period, the domain will be
 purged from the Registry database.

RESTORE COMMAND

NeuStar will use the existing EPP Renew command as the basis for the Restore command. In addition, EPP extensions will be used to capture additional required information as set forth below in the section entitled "Registrar Reporting Requirements."

<u>REPORTS</u>

Registrars may only restore domains in order to correct unintentional deletions caused by the registrant or Registrar. Restoring registered domains in order to assume the rights to use or sell them will be considered a violation of the Registrar Agreement.

Registrar Reporting Requirements

Registrats must verify their compliance with the intention of the RGP service by submitting a Registrar Restore Report to the Registry. The primary purpose of the report is to identify the circumstance that led to the Restore request. NouStar will take advantage of its "thick" registry to collect the reporting data at the time the Restore command is submitted. The following data is already collected and stored by the Registry, and as such will not need to be provided separately by the Registrar:

- WHOIS data for deleted name, as it existed prior to deletion.
- WHOIS data for deleted name, as it existed at the time of report submission
- Exact date and time of deletion
- Exact date and time of redemption

In addition, the following information must be submitted by the Registrar to the Registry as part of the Restore command. Failure to provide all of the following data at the time the command is submitted will result in a failure to restore the demain name.

- Written explanation and corresponding reason code as to why registered name was restored (e.g., Registrar error, dispute resolution, etc.)
- Written statement affirming that Registrer has not, unless required by law, restored the .US domain name in question in order to
 assume the rights to use or sell the name for itself or for any third party
- Written statement affirming that information in report is factually accurate to the best of the Registrar's knowledge

NeuStar will retain copies of all Registrar Restore and will provide the United States Department of Commerce with such reports as requested.

Registry Reporting Requirements

To facilitate the recirculation of unredecimed domein names back into the publicly available pool of names, NeuStar will provide comprehensive, regularly updated lists of names with a PendingDelete status to all Registrars via an FTP or SCP mechanism; these lists will

SB1335-02-W-0175 MOD NO. 0013

Рада - 2

include corresponding dates of deletion. Other than as set forth in these paragraphs, no Registrars will be able to modify or restore names with a PandingDelete status.

FEES

NeuStar proposes a ticred fee structure as follows:

- For the first five (5) days of the RGP, a domain name that has been unintermionally deleted can be restored for a one-time fee of \$6.00.
- The cost of restoring an accidentally deleted name will be raised to a one-time fee of \$40.00 for the remaining 25 days of the RGP.

Please also note that fees associated with the restoration of a domain name through the RGP are separate and apart from the fees that are due and payable to NeuStar for the registration or renewal of a domain name. Thus, if a domain name is deleted within five (5) days of the expiration of a domain name registration and a domain name registrant would like to restore the name through the RGP, the registry would charge the registrar the 56 for the restoration plus \$5.50 for the renewal of the domain name. If the restoration occurs more than five (5) days after the expiration of the domain name, the registry would charge the registrar \$40 for the restoration of the domain name plus \$5.50 for the one (1) year renewal of the domain name registration.
